EXPERT PANEL PARTICIPANTS

- Cinderella Barrios-Cernik – LAC, Alcohol and Drug Program Administration
- Arthur Bowler, PsyD – Private Practice
- Darrell Flynn – Behavioral Health Service, American Recovery Center
- Lurlene Joyce, RN, PHN – LAC, Office of AIDS Programs and Policy
- Kevin Koffler – Tarzana Treatment Center
- Jenell Legard – LAC, Office of AIDS Programs and Policy
- Janis Martin, CH, CDS – Private Practice
- Jim Peck, PsyD – UCLA Integrated Substance Abuse Programs
- Chris Perry – Tarzana Treatment Center
- Donald Price – Southern California Alcohol and Drug Programs
- Cathy J. Reback, PhD – Van Ness Recovery House Prevention Division, and Center for HIV Identification, Prevention and Treatment Services
- LaFonda Riggins – LAC, Office of AIDS Programs and Policy
- René Seidel – LAC, Office of Clinical Affairs and Affiliations
- Diana Vasquez, RN, MPA – LAC, Office of AIDS Programs and Policy
- Kathy Watt, MA – Van Ness Recovery House

SERVICE INTRODUCTION

HIV substance abuse treatment services provided under contract with the Los Angeles County Office of AIDS Programs and Policy can include:

- Substance abuse day treatment
- Substance abuse methadone maintenance
- Substance abuse residential detoxification

All programs will utilize available standards of care to inform their services and will operate in accordance with legal and ethical standards. The importance of maintaining confidentiality is of critical importance and cannot be overstated. All programs must comply with the Health Insurance Portability and Accountability Act (HIPAA) standards and California State law for information disclosure.

The goals of HIV substance abuse treatment services for people living with HIV include assisting and empowering clients to:

- maximize the effectiveness of their HIV-related medical care and treatment through the cessation or reduction of substance abuse
- improve social functioning with partners, peers and family
- improve self-esteem, insight and awareness
- learn to positively cope and live with HIV

Several themes reoccur throughout this Standard:

- Substance abuse treatment services will respect the inherent dignity of clients and will be client-centered, aiming to foster client self-determination
- It is critical to understand the interplay and integrate services between HIV medical care, mental health, substance abuse and HIV risk reduction and prevention activities
- The development of practical life skills, improved personal functioning, effective coping with life problems, and improved social functioning, self-esteem, confidence and insight are important components of substance abuse treatment
- Staff must be appropriately trained, licensed or certified in order to provide appropriate services
- Harm reduction should be considered as an alternative or additional modality, though this modality is not addressed specifically in this document

The Los Angeles County Commission on HIV and the Office of AIDS Program and Policy have developed this Standard of Care in order to set minimum quality expectations for service provision and to guarantee clients consistent care, regardless of where they receive services in the county. A draft of this Standard will be reviewed by an expert panel, consisting of leading providers and administrators in the field, as well as actual consumers of the service. A final draft of this Standard will be presented to the Commission on HIV for adoption after a 3-week Public Comment period.

This draft represents a synthesis of a significant number of published Standards and research. The key source documents included:

- *Substance Abuse Services – Day Treatment Contract Exhibit*, Office of AIDS Programs and Policy
- *Substance Abuse Services – Residential Detoxification Contract Exhibit*, Office of AIDS Programs and Policy
- *Mercer Report and Rate Study*, Office of AIDS Programs and Policy, 2004
- *HIV/AIDS and Substance Use Standards of Care*, Los Angeles County Commission on HIV Health Services, 2002
- *Treatment Improvement Protocol #37 – Substance Abuse Treatment for Persons living with HIV and AIDS*, Substance Abuse and Mental Health Administration, 2000
- Standards of Care developed by several other Ryan White Title I Planning Councils. Most valuable in the drafting of this Standard were Portland, 2005; Orlando, 2002; and San Antonio 2005

SERVICE/ORGANIZATIONAL LICENSURE CATEGORY

Certification Categories:

- Substance Abuse Day Treatment -- Outpatient Day Care Habilitative

Licensure Categories

- Substance Abuse Methadone Maintenance – Narcotic Treatment Program
- Substance Abuse Residential Detoxification – Chemical Dependency Recovery Hospital or Acute Psychiatric Facility

DEFINITIONS AND DESCRIPTIONS

Detoxification is the process through which a person's withdrawal syndrome is managed as the body rids itself of noxious or intoxicating substances and their effects.

Maintenance Treatment is a modality in which replacement narcotic therapy is used in sustained (beyond 21 days), medically-determined dosages to reduce or eliminate chronic opiate addiction during which time a client is provided an extensive range of ancillary treatment services.

Medical Detoxification is the administration of any medication that helps to manage or prevent withdrawal syndromes.

Narcotic Treatment Programs consist of inpatient and/or outpatient opiate addiction treatments that offer methadone or other opiate replacement therapy in maintenance, decreasing levels of therapy or detoxification services.

Substance Abuse Day Treatment consists of non-residential therapeutic services that provide a minimum of five hours of planned individual, group and/or structured therapeutic activities per day. Clients must attend a minimum of three days per week.

Substance Abuse Residential Detoxification Services medically assist a person in the process of the physiological removal of noxious or intoxicating substances and their effects in a licensed residential facility.

HOW SERVICE RELATES TO HIV

There are currently over 20,000 people known to be living with AIDS in Los Angeles County. It is estimated that over 54,000 are infected with HIV. Los Angeles County comprises 35% of the total AIDS cases in the state of California (Los Angeles Co, 2005).

In recent nationally representative study sample of people receiving HIV medical care, 8-12% of participants were classified as current heavy drinkers, 13% were other drug dependent and 26% were current, non-dependent users of drugs (not including marijuana)(Bing et al., 2001; Galvan et al., 2002; Klinkenberg & Sacks, 2004).

It can be overwhelming for a substance-abusing person living with HIV to gain access to a formalized system of care (Lidz et al., 1992). Many people with substance abuse problems have multiple, chronic problems that require the coordination of services beyond substance abuse treatment alone (Bokos et al., 1992). Multiple problems such as poor health, lack of housing, and a transient lifestyle can also negatively impact a substance abusing person's ability to seek treatment (Cox et al., 1993).

Substance abuse is correlated with risky sex among men living with HIV (Kalichman, 1999). More severe drug abuse is associated with greater sexual risk taking (Morrill et al., 2001). Drug use may also be associated with suppressed immune functioning (Millstein, 1992).

People living with HIV who are also injection drug users appear less likely to access antiretroviral medications than others (Anderson, et al., 2000). Current substance use, both licit and illicit, inhibits adherence to HIV medications (Golin et al, 2002; Chesney et al., 2000). People living with HIV who report using alcohol and other drugs as a coping strategy have been found to be significantly less adherent than those without substance use problems (Power, et al., 2003). Alcohol use has been associated with poor medication adherence in HIV positive individuals (Uldall, et al., 2004).

Studies have found a reduction in sexual risk behavior among people who stopped their substance use after substance abuse treatment (Abbott et al., 1998, Stall et al., 1999). Lucas et al. (2001) and Moatti et al. (2000) found that people living with HIV who switched from active substance use to non-use improved their adherence. Methadone maintenance treatment has been linked to better adherence to highly active antiretroviral treatment (Clarke et al., 2003).

SERVICE COMPONENTS

HIV substance abuse treatment services are offered to medically indigent (uninsured or unable to get insurance), chemically dependent persons living in Los Angeles County. In the case of day treatment services, programs may serve up to 40% of clients who are HIV negative crystal methamphetamine users at very high risk of HIV infection. Despite countless prevention messages, the use of alcohol and other drugs has exacerbated the HIV/AIDS pandemic. Substance abuse treatment across all modalities can play a vital role in helping users/abusers reduce risk-taking behavior, and thus helping to reduce the incidence of HIV/AIDS.

It is critical that collaborative networks of integrated systems of care are readily available to substance use/abuse treatment facilities. These systems must incorporate medical care, mental health, psychosocial case management, dental care, and legal services -- areas that substance users tend to neglect prior to seeking help for drug use. Programs must continually work toward removing barriers to care that have been created unknowingly. All services must be respectful of ethnic, cultural and economic identities, along with a clear understanding of sexual orientation and lifestyle. Substance abusers have long been severely marginalized throughout the HIV/AIDS pandemic. As such, programs must meet the substance user where s/he is, not where services start. All HIV substance abuse treatment services will be culturally and linguistically appropriate to the target population (see PROGRAM REQUIREMENTS AND GUIDELINES). In addition, HIV substance abuse treatment services will respect the inherent dignity of clients and will be client-centered, aiming to foster client self-determination.

Along with more standard abstinence-based approaches, programs should consider harm reduction as an alternate or additional modality. Harm reduction is a non-judgmental approach that views substance use as a social behavior along a continuum from experimental use to compulsive use. The approach contends that compulsive users mature and desire to discontinue or reduce drug use. The harm reduction strategy attempts to reduce the harmful consequences of substance use for persons along all levels of the use continuum. The goals of harm reduction include reducing the risk of harm attached to substance abuse and reducing the risk of HIV infection or re-infection through substance abuse.

Providers utilizing a harm reduction approach attempt to engage substance users in a relationship that builds toward readiness for treatment and change, while educating them on the risks for transmission of HIV and other infectious diseases known to be associated with substance abuse. Providers are encouraged to refer to Prochaska's Transtheoretical Model of Personal Change for further guidance in assessing an individual's readiness for change and further information about transmission and infection risk information (<http://www.uri.edu/research/cprc/transtheoretical.htm>).

HIV substance abuse treatment services provided under contract with the Los Angeles County Office of AIDS Programs and Policy can include:

- Substance abuse day treatment
- Substance abuse methadone maintenance
- Substance abuse residential detoxification

STANDARD	MEASURE
Substance abuse treatment services will respect inherent dignity of clients and will be client-centered, aiming to foster client self-determination	Supervision and program review to confirm

SUBSTANCE ABUSE DAY TREATMENT

Substance abuse day treatment services are non-residential therapeutic services that provide a minimum of five hours of planned activities per day. Programs are designed to be more intensive than outpatient visits, but less extensive than 24 hour residential services. At minimum, services should be offered at least five hours per day, five days per week of individual, group sessions and structured therapeutic activities. The length of stay in HIV substance abuse day treatment services is not to exceed 90 days. Extensions can be made if the client meets continuing stay criteria in accordance with the American Society of Addiction Medicine (ASAM) and have been approved by OAPP.

Services will emphasize the intersection between HIV and substance abuse, with special focus given to the psychosocial aspects of living with HIV and HIV prevention. Whenever possible, clients should be provided gender and/or sexual identity-specific services or be referred to appropriate agencies/programs that provide such services. Programs will strive to actively engage clients in treatment that emphasizes:

- Interventions, activities and service elements designed to alleviate or preclude alcohol and/or other drug problems, as well as relapse prevention, in the individual, their family and/or community
- The goals of physical health, well-being and practical life skills (including the ability to be self-supporting, improved personal functioning and effective coping with life problems). Special emphasis will be given to HIV information and care.
- Social functioning (including improved relationships with partners, peers and family; socially acceptable ethics; and enhanced communication and interpersonal skills)

- Improving the individual's self-image, esteem, confidence, insight, understanding and awareness
- Additional life skills (including communication, finance management, job training, hygiene, leisure activities, homemaking and parenting skills, stress management, relaxation and anger management and physical fitness)

Planned program activities shall include (at minimum):

- Intake
- Assessment
- Individual service planning
- Crisis intervention
- Individual, group and family counseling
- Support groups
- Education
- Weekly case conference
- Referral

Programs providing HIV substance abuse day treatment services will do so in accordance with Chapter 5, Division 4, Title 9 of the California Code of Regulations, procedures adopted by the Office of AIDS Programs and Policy, and consistent with state and local laws and regulations.

STANDARD	MEASURE
Substance abuse day treatment services should be offered at least five hours per day, five days per week of individual, group sessions and structured therapeutic activities	Program policy and procedure manual and schedule to verify
The length of stay in HIV substance abuse day treatment services is not to exceed 90 days.	Client file to confirm. Extensions can be made if client meets ASAM criteria and approved through OAPP
Programs will provide services that emphasize: <ul style="list-style-type: none"> • Interventions, activities and service elements designed to alleviate or preclude alcohol and/or other drug problems, as well as relapse prevention • The goals of physical health and well-being and practical life skills with special emphasis on HIV information and care 	Program policy and procedure manual, schedule and program monitoring to verify

<ul style="list-style-type: none"> • Social functioning • Improving the individual's self-esteem and insight • Additional life skills 	
Services will emphasize the intersection between HIV and substance abuse	Policies and procedures and program review to confirm
Clients should be provided gender and/or sexual identity-specific services or be referred, whenever possible	Policies and procedures and program review to confirm. Linked referrals on file in client chart
Planned program activities shall include (at minimum): <ul style="list-style-type: none"> • Intake • Assessment • Individual service planning • Crisis intervention • Individual, group and family counseling • Support groups • Education • Weekly case conference • Referral 	Program policy and procedure manual, schedule and program monitoring to verify
Programs will comply with Chapter 5, Division 4, Title 9 of the California Code of Regulations and procedures adopted by the OAPP and consistent with state and local laws and regulations.	Program policy and procedure manual, schedule and program monitoring to verify

Intake – Substance Abuse Day Treatment

Client intake is required for all patients who request or are referred to HIV substance abuse day treatment services. The intake determines eligibility and includes demographic data, emergency contact information, next of kin and eligibility documentation. When possible, client intake will be completed in the first contact with the potential client. In addition, client intake for substance abuse day treatment services will include a medical history complete with CD4 count and viral load measurements when available. If CD4 and viral load measurements are not available at intake, staff will attempt to produce them within 30 days by searching the County's HIV data management system, communication with the client's medical provider or linking client to HIV primary medical care. (See Exhibit 1 in LINKAGES AND TOOLS for a sample Intake form.)

In the intake process and throughout HIV substance abuse day treatment service delivery, **client confidentiality** will be strictly maintained and enforced. All programs will follow HIPAA guidelines and regulations for confidentiality. As needed, **Release of Information** forms will be gathered. These forms detail the specific person/s or agencies to or from whom information will be released as well as the specific kind of information to be released. New forms must be added for individuals not listed on the most current Release of Information. (Specification should indicate the type of information that can be released.)

Required Forms: Programs must develop the following forms in accordance with state and local guidelines. Completed forms are required for each client:

- Release of Information (must be updated annually). New forms must be added for those individuals not listed on the existing Release of Information. (Specification should be made about what type of information can be released.)
- Limits of Confidentiality
- Consent to Receive Services (See Exhibit 2 in LINKAGES AND TOOLS for a sample Consent form.)
- Client Rights and Responsibilities
- Client Grievance Procedures

Additionally, the client's file must include the following documentation for eligibility:

- Proof of HIV diagnosis
- Proof of income
- Proof of residence in Los Angeles County

STANDARD	MEASURE
Intake process is begun during first contact with client	Intake tool is completed and in client file
Eligibility for services is determined	Client's file includes: <ul style="list-style-type: none"> • Proof of HIV diagnosis • Proof of income • Proof of Los Angeles County residence
Confidentiality policy and Release of Information is discussed and completed	Release of Information signed and dated by client on file and updated annually
Consent for Services completed	Signed and dated Consent in client file
Client is informed of Rights and Responsibility and Grievance Procedures	Signed and dated forms in client file

Intake for substance abuse day treatment services will include medical history complete with CD4 count and viral load measurements	Signed, dated intake including this information on file in client chart
If CD4 and viral load measurements are not available, staff have 30 days to produce them	Client chart to detail efforts including: <ul style="list-style-type: none"> • Searching County database • Communication with current medical provider • Linking client to HIV primary care

Assessment – Substance Abuse Day Treatment

Clients must be assessed and their eligibility determined before being accepted into substance abuse day treatment services.

- **Eligibility** – Persons eligible for substance abuse day treatment services must have a Diagnostic and Statistical manual of Mental Disorders (DSM-IV TR) diagnosis of substance abuse or substance dependence and meet the following criteria:
 - Withdrawal potential – Client is at minimal risk for withdrawal
 - Biomedical conditions – No biomedical conditions that interfere with addiction treatment
 - Emotional/behavioral conditions – Only mild severity emotional/behavioral conditions present with little potential to distract from recovery
 - Treatment acceptance/resistance – A client's resistance is high enough to require a structured program, but not so high as to make outpatient treatment ineffective
 - Relapse potential – There is a likelihood of relapse without the close monitoring and structure that programs offer
 - Recovery environment – Client is currently in an unsupportive environment, but can cope given the structure and support a program offers
- **Assessment** – Clients will be assessed in order to obtain information required to recommend the most appropriate course of treatment. The assessment process should include the use of the Addiction Severity Index. Assessments will include (at minimum):
 - Archival data including prior arrests and contacts with the criminal justice system, previous assessments, treatment records
 - Patterns of drug and alcohol use
 - Impact of drug and alcohol abuse on major life areas such as relationships, family, employment and self-concept

- Risk factors for continued drug and alcohol abuse, including family history of drug and alcohol abuse and social problems
- HIV risk behaviors and factors
- Current medical condition and relevant history, including emergency needs (for HIV positive clients, specific information related to HIV medical care will also be gathered)
- PPD and/or chest x-ray as required by Los Angeles County guidelines
- History of sexually transmitted diseases
- Current HIV medications and possible illicit drug interactions
- Mental health history and psychological testing (when available)
- Educational and vocational background
- Housing status
- Legal issues, including domestic violence and child welfare issues
- Suicide, health, or other crisis risk assessments
- Abilities, aptitudes, skills and interests
- Client motivation and readiness for treatment
- Client attitudes and behavior during assessment

Clients will sign an HIPAA compliant release of information form in order for the program to coordinate with the client's medical provider to obtain information including, medical history, results of physical examinations and result of lab tests. Those clients without medical care providers will be referred to a medical provider as soon as possible. Seeking and complying with medical care will be a treatment plan priority for those clients without a medical provider.

If the eligibility and assessment processes determine that the program cannot meet the needs of the client, a referral to an alternate provider must be made.

STANDARD	MEASURE
<p>All clients will be assessed to determine if they meet eligibility criteria for substance abuse day treatment:</p> <ul style="list-style-type: none"> • DSM-IV TR diagnosis of substance abuse or substance dependence • Minimal withdrawal potential • No biomedical conditions • Mild emotional/behavioral conditions • High treatment resistance to require structured program • High likelihood of relapse necessitating monitoring and structure • Client's current environment is 	<p>Signed, dated assessment in client chart to verify</p>

unsupportive to recovery	
<p>All clients will be assessed to determine their level of need, utilizing the Addiction Severity Index covering the following:</p> <ul style="list-style-type: none"> • Archival data • Patterns of drug and alcohol use • Impact of drug and alcohol abuse on major life areas • Risk factors for continued drug and alcohol abuse • Current medical condition and relevant history • Mental health history and psychological testing • Educational and vocational background • Suicide, health, or other crisis risk assessments <p>The following other assessment information will also be gathered (at minimum):</p> <ul style="list-style-type: none"> • HIV risk behaviors and factors • PPD and/or chest x-ray • History of sexually transmitted diseases • Current HIV medications and interactions • Housing status • Legal issues • Abilities, aptitudes, skills and interests • Client motivation and readiness for treatment • Client attitudes and behavior 	Signed, dated assessment in client chart to verify
Programs will coordinate with client's medical provider or refer clients to medical care providers as soon as possible. Medical care is treatment priority.	Progress notes to verify. HIPAA compliant release of information form on file in client chart
If program cannot meet the needs of the client, a referral to an alternate provider must be made.	Referrals on file in client chart for those clients whose needs cannot be addressed by program

Treatment Plan – Substance Abuse Day Treatment

A collaborative treatment plan will be developed for all clients based on the information gathered in the initial assessment. The treatment plan serves as the framework for the type and duration of services provided during the client's participation in the program and should include a plan review and re-evaluation schedule. Treatment plans will address necessary gender and/or sexual identity-specific services based on individual client need. Such services will be provided either on site, or by linked referral. For HIV positive clients, the treatment plan will include referrals to HIV medical care, case management and other supportive services.

An **interim treatment** plan, which identifies the client's immediate needs, must be developed within three days of the date of admission. Clients must also sign an admission agreement authorizing treatment within three days of program admission.

A **comprehensive treatment** plan which includes long and short term goals for continuing treatment will be developed collaboratively within 14 days of admission. At minimum, treatment plans will:

- Contain goals and objectives that reflect problem areas that have been identified in the assessment and that are broken down into manageable, measurable units with completion dates
- Identify activities or tasks the client must complete in order to attain the stated recovery goal and be action-oriented, reflecting the client's changing needs
- Be reviewed and re-evaluated as the client's needs change or phases of treatment are completed, but no less than 28 days after initial development and every 90 days thereafter
- Be signed and dated by the counselor and client each time the treatment plan is developed, reviewed or re-evaluated

Program staff will regularly observe each client for changes in physical, mental, emotional and social functioning. If, during the course of treatment, needs are revealed which require a change in the existing level of service referral to another service provider will be made.

STANDARD	MEASURE
Interim treatment plans identifying immediate needs must be developed within three days of the date of	Signed, dated interim treatment plan on file in client chart

admission.	
Clients will sign admission agreement within three days of program admission	Signed, dated admission agreement on file in client chart
Comprehensive treatment plans, including long and short term will be developed collaboratively within 14 days of admission. Treatment plans will be re-evaluated no less than 28 days after initial development and every 90 days thereafter (or whenever client's needs change). Treatment plans will include (at minimum): <ul style="list-style-type: none"> • Goals and objectives reflecting problem areas identified in the assessment, broken down into manageable, measurable units with completion dates • Activities or tasks the client must complete. Tasks will be action-oriented, reflecting the client's changing needs 	Signed, dated treatment plans and re-evaluations on file in client chart
Program staff will observe clients for changes in physical, mental, emotional and social functioning. If newly revealed needs which require a change in service referral to another service provider will be made.	Signed, dated progress notes in client chart to confirm

Services – Substance Abuse Day Treatment

Day treatment programs must develop a schedule of activities and events that promote sustained recovery and include individual and group activities for a minimum of five hours per day, five days per week. Programs will actively engage clients in treatment that emphasizes interventions and activities designed to alleviate or preclude alcohol and/or other drug problems in the individual, their family and/or the community. Services will emphasize the intersection between HIV and substance abuse, with special focus given to the psychosocial aspects of living with HIV and HIV prevention. Whenever possible, clients should be provided gender and/or sexual identity-specific services or be referred and linked to appropriate providers who provide such services. Activities will focus on:

- Abstinence and relapse prevention
- Physical health and well-being

- Practical life skills, leading to the ability to be self-supporting including:
 - finance management
 - hygiene
 - developing leisure activities
 - homemaking and parenting skills
 - stress and anger management
 - physical fitness.
- Improved personal functioning and effective coping with life problems
- Social functioning, including improved relationships with family, partners and peers, socially acceptable ethics, and enhanced communication and relationship skills
- Self-image, esteem, confidence, insight, understanding and awareness

STANDARD	MEASURE
Treatment will emphasize interventions designed to alleviate or preclude alcohol and/or other drug problems that focus on: <ul style="list-style-type: none"> • Abstinence and relapse prevention • Physical health and well-being • Improved personal functioning and effective coping with life problems • Social functioning • Self-esteem and awareness 	Program policy and procedures and schedule to confirm
Services will emphasize the intersection between HIV and substance abuse, with special focus given to the psychosocial aspects of living with HIV and HIV prevention.	Program policy and procedures and program review to confirm
Whenever possible, clients should be provided gender and/or sexual identity-specific services or be referred and linked	Program policy and procedures and program review to confirm. Referrals and linkages on file in client charts

Support Services – HIV Substance Abuse Day Treatment

Programs will provide or coordinate the following services (at minimum):

- Health-related services (medical care, medication management, adherence, etc.)

- HIV transmission risk assessment and prevention counseling
- Social services
- Recreational activities
- Meals
- Housekeeping and laundry
- Transportation
- Housing

STANDARD	MEASURE
Programs will provide or coordinate the following (at minimum): <ul style="list-style-type: none"> • Health-related services • HIV transmission risk assessment and prevention counseling • Social services • Recreational activities • Meals • Housekeeping and laundry • Transportation • Housing 	Program policy and procedures to confirm. Record of services and referrals on file in client chart

Counseling Services – HIV Substance Abuse Day Treatment

Programs will make available counseling services for their clients. The selection, frequency and intensity of these services will be determined collaboratively between the counselor and client, identified and agreed upon in the initial assessment and treatment plan. Counseling services will include:

- Crisis Intervention – assesses immediate risk, precipitating factors and provides short term solution-oriented approach to identified problem
- Couples Counseling – explores areas such as the interplay between domestic violence and substance abuse, HIV issues, sexual concerns, parenting, etc.
- Individual Counseling or Psychotherapy – one-on-one approach to explore substance abuse issues, including co-existing mental health concerns, loss and grief, cross addictions, relapse prevention, as well as the issues listed under couples counseling (above) as applicable.
- Family Counseling – explores the effect of substance abuse on the family system and addresses such issues as parenting as an HIV positive person, permanency planning and other HIV-related custodial care issues, co-dependency, roles, conflict resolution, etc.

- Group Counseling – consisting of from four to ten participants and covering topics such the interplay between substance abuse and HIV, risk behaviors, sexual identity, relapse, etc.
- Support Groups – either Peer or professionally led, providing an environment of support for individuals in recovery.

Clients should be referred to a psychiatrist who specializes in addiction medicine whenever possible if there is need for further evaluation and/or treatment with psychotropic medications.

STANDARD	MEASURE
Programs will make available counseling services for their clients; selection, frequency and intensity collaboratively determined by the assessment and each client's needs and requests. Counseling services will include: <ul style="list-style-type: none"> • Crisis intervention • Couples counseling • Individual counseling or psychotherapy • Family counseling • Group counseling • Support Groups 	Program policy and procedures to confirm. Record of services and referrals on file in client chart
Clients will be referred to psychiatrist who specializes in addiction medicine whenever possible if further evaluation and/or psychotropic medications are needed	Signed, dated progress note to document referral

Education – Substance Abuse Day Treatment

Programs will provide education to clients and their families on an ongoing basis to include (but not be limited to):

- HIV 101
- HIV prevention
- HIV risk reduction practices
- Harm reduction
- Addiction education, including IV drug use
- Licit and illicit drug interactions, including HIV medications

- Medical complications of substance use
- Hepatitis and other sexually transmitted diseases
- Medication adherence and nutrition
- Important health and self-care practices
- Developing a healthy sexual life, covering topics such as stigma, safer sex, disclosure and issues of domestic violence and sexual abuse
- Referral agencies supportive to people living with HIV (especially HIV support groups, 12 step meetings and 12 step alternatives)

STANDARD	MEASURE
<p>Programs provide education to clients and their families on an ongoing basis including (at minimum):</p> <ul style="list-style-type: none"> • HIV 101 • HIV prevention • HIV risk reduction practices • Harm reduction • Addiction education, including IV drug use • Licit and illicit drug interactions, including HIV medications • Medical complications of substance use • Hepatitis and other sexually transmitted diseases • Medication adherence and nutrition • Health and self-care practices • Developing a healthy sex life • Referrals 	<p>Signed, dated progress notes to detail education provided on file in client chart</p>

Case Conferences – Substance Abuse Day Treatment

Programs shall conduct weekly multidisciplinary discussions to review a client's status, assessment of client's needs, and planned interventions to accomplish identified goals. Documentation of Case Conferences shall be maintained within each client record in a Case Conference log.

STANDARD	MEASURE
<p>HIV substance abuse day treatment programs will conduct weekly multidisciplinary case conferences</p>	<p>Case Conference documentation, signed by the supervisor, in client record to include:</p> <ul style="list-style-type: none"> • Date, name of participants and name of client discussed • Issues and concerns

- | | |
|--|--|
| | <ul style="list-style-type: none"> • Follow-up plan |
|--|--|

Referral and Linkages – HIV Substance Abuse Day Treatment

Programs providing HIV substance abuse day treatment services will demonstrate active collaboration with other agencies to provide referral to the full spectrum of HIV-related services. Formal relationships with mental health providers are especially important for assistance in crisis management or psychiatric emergencies.

Programs must maintain a comprehensive list of target providers (both internal and external), including, but not limited to HIV LA, for the full spectrum of HIV-related services. Programs will refer and link clients to services consistent with their needs and supportive of their rehabilitation. Programs must develop a mechanism to determine if referrals have been successful. Programs will maintain and ensure clients' confidentiality throughout the referral and linkage process and will refer clients to appropriate gender and sexual identity-specific services when indicated. Referrals and linkages will include (but not be limited to):

- medical care
- mental health treatment
- case management
- treatment advocacy
- peer support
- vocational training
- education
- legal services
- treatment education
- dental treatment

Programs will make available to clients information about public health, social services and where to apply for state, federal and/or county entitlement programs.

STANDARD	MEASURE
Programs will demonstrate active collaboration with providers of full spectrum of HIV-related services; especially important are active linkages to mental health providers	Memoranda of Understanding on file at provider agency
Programs must maintain a list of target providers to full spectrum of HIV-related services	Referral list on file at provider agency
Programs will refer and link clients to	Signed, dated progress notes on file in

services including (but not limited to): <ul style="list-style-type: none"> • medical care • mental health treatment • case management • treatment advocacy • peer support • vocational training • education • legal services • treatment education • dental treatment 	client chart to detail referrals and linkages
Programs must develop a mechanism to determine if referrals have been successful	Referral follow-up plan on file at provider agency. Progress notes on file in client chart to detail
Programs will maintain and ensure clients' confidentiality throughout the referral and linkage	Program policies and procedures to outline. Program review to confirm.
Programs will refer clients to appropriate gender and sexual identity-specific services when indicated.	Program policy and procedures and program review to confirm. Referrals and linkages on file in client charts
Programs will provide clients with public health and social service entitlement program information	Signed, dated progress notes on file in client chart to detail

Discharge Planning – Substance Abuse Day Treatment

Staff will collaborate with clients who have successfully completed a day treatment program to develop a written aftercare plan that includes substance abuse treatment recommendations of various modalities and approaches, as well as referrals to appropriate services. Clients will be given a copy of the aftercare plan. Clients will be encouraged to contact the program at any time. Programs will develop mechanisms to ensure that they maintain contact with their clients post discharge.

Aftercare services provide a safety net for clients who are new to recovery while rebuilding their lives and living with HIV. Ideally, transitional or aftercare services should be provided by a program counselor involved with the client's discharge planning and prior treatment. Services are in the form of individual or group counseling and range from three to 12 months depending on client need. Sessions can address such issues as:

- Substance abuse and HIV/AIDS information
- Relapse prevention
- Personal budgeting

- Program sponsor work
- Re-establishing support groups
- Exploring and supporting sexual identification and behavior
- Maintaining sobriety
- Medication adherence

STANDARD	MEASURE
Program staff will collaboratively develop written aftercare plan with clients to have completed treatment	Signed, dated aftercare plan on file in client chart. Client has received copy of same
Programs will maintain contact with clients post discharge	Signed, dated progress notes on file in client chart to record attempts to maintain contact
Aftercare services can include individual and/or group counseling and ideally provided by a counselor familiar with the client	Signed, dated progress notes on file in client chart to record aftercare services

Program Records – Substance Abuse Day Treatment

Client records shall include (but not be limited to):

- Intake information consisting of personal, family, education, drug of choice, criminal and medical history (including current physical, urinalysis and HIV status)
- Client identification data
- Diagnostic studies and tests (when appropriate)
- Treatment plan which includes problem list, short and long-term goals, and action steps generated by staff and client
- Assignment of a primary counselor and notification of change of counselor when indicated
- Description of type and frequency of services including counseling and support services provided
- Record of client interviews
- Progress notes corresponding to treatment plan that include:
 - Date, time and length of contact
 - Type of contact (i.e., group, crisis, phone call, etc.)
 - Relevant information from contact
 - Necessary action requested
 - Name, title and signature of staff member making entry
- Referrals and linkages
- Discharge/transfer summary
- Aftercare plan

STANDARD	MEASURE
<p>Client records shall include (but not be limited to):</p> <ul style="list-style-type: none"> • Intake information • Client identification data • Diagnostic studies and tests • Treatment plan • Assignment of a primary counselor and changes when indicated • Description of type and frequency of services provided • Record of client interviews • Progress notes corresponding to treatment • Referrals and linkages • Discharge/transfer summary • Aftercare plan 	<p>Client chart audit to verify</p>

SUBSTANCE ABUSE METHADONE MAINTENANCE

Programs providing substance abuse methadone maintenance services must be licensed by the Department of Alcohol and Drug programs and will operate in accordance with Chapter 4, Division 4, Title 9 of the California Code of Regulations, procedures adopted by the Office of AIDS Programs and Policy, and consistent with state and local laws and regulations.

Services will emphasize the intersection between HIV and substance abuse, with special focus given to the psychosocial aspects of living with HIV and HIV prevention. Whenever possible, clients should be provided gender and/or sexual identity-specific services or be referred to appropriate providers who provide such services. Substance abuse methadone maintenance programs must provide the following services:

- Intake
- Treatment planning
- Medical direction
- Body specimen screening, including urinalysis screening at admission and at least monthly thereafter
- Substance abuse and HIV related physician and nursing services
- At least one 50-minute individual counseling session per month, with weekly sessions to be offered as appropriate, especially in the beginning stages of treatment.
- Group counseling
- Support groups (including 12 step-based and 12 step alternatives)

- HIV education
- Physical examination and laboratory tests at admission
- Providing methadone, prescribed by a physician, to alleviate opiate withdrawal symptoms

STANDARD	MEASURE
<p>Substance abuse methadone maintenance programs must provide (at minimum):</p> <ul style="list-style-type: none"> • Intake • Treatment planning • Medical direction • Body specimen screening, including urinalysis screening at admission and at least monthly thereafter • Substance abuse and HIV physician and nursing services • At least one 50 minute individual counseling session/mo • Group counseling • Support groups • HIV education • Physical examination and laboratory tests at admission • Methadone, prescribed by a physician 	<p>Program policy and procedure manual, and program monitoring to verify</p>
<p>Services will emphasize the intersection between HIV and substance abuse</p>	<p>Policies and procedures and program review to confirm</p>
<p>Clients should be provided gender and/or sexual identity-specific services or be referred, whenever possible</p>	<p>Policies and procedures and program review to confirm. Linked referrals on file in client chart</p>
<p>Programs be licensed by Department of Alcohol and Drug Programs and will comply with Chapter 5, Division 4, Title 9 of the California Code of Regulations and procedures adopted by the OAPP and consistent with state and local laws and regulations.</p>	<p>License on file at provider agency. Program policy and procedure manual, and program monitoring to verify</p>

Intake – Substance Abuse Methadone Maintenance

Client intake is required for all patients who request or are referred to substance abuse methadone maintenance services. The intake determines eligibility and

includes demographic data, emergency contact information, next of kin and eligibility documentation. When possible, client intake will be completed in the first contact with the potential client. In addition, client intake for substance abuse methadone maintenance services will include a medical history complete with CD4 count and viral load measurements when available. If CD4 and viral load measurements are not available at intake, staff will attempt to produce them within 30 days by searching the County's HIV data management system, communication with the client's medical provider or linking client to HIV primary medical care. (See Exhibit 1 in LINKAGES AND TOOLS for a sample Intake form.)

In the intake process and throughout HIV substance abuse methadone maintenance service delivery, **client confidentiality** will be strictly maintained and enforced. All programs will follow HIPAA guidelines and regulations for confidentiality. As needed, **Release of Information** forms will be gathered. These forms detail the specific person/s or agencies to or from whom information will be released as well as the specific kind of information to be released. New forms must be added for individuals not listed on the most current Release of Information. (Specification should indicate the type of information that can be released.)

Required Forms: Programs must develop the following forms in accordance with state and local guidelines. Completed forms are required for each client:

- Release of Information (must be updated annually). New forms must be added for those individuals not listed on the existing Release of Information. (Specification should be made about what type of information can be released.)
- Limits of Confidentiality
- Consent to Receive Services (See Exhibit 2 in LINKAGES AND TOOLS for a sample Consent form.)
- Client Rights and Responsibilities
- Client Grievance Procedures

Additionally, the client's file must include the following documentation for eligibility:

- Proof of HIV diagnosis
- Proof of income
- Proof of residence in Los Angeles County

STANDARD	MEASURE
Intake process is begun during first contact with client	Intake tool is completed and in client file

Eligibility for services is determined	Client's file includes: <ul style="list-style-type: none"> • Proof of HIV diagnosis • Proof of income • Proof of Los Angeles County residence
Confidentiality policy and Release of Information is discussed and completed	Release of Information signed and dated by client on file and updated annually
Consent for Services completed	Signed and dated Consent in client file
Client is informed of Rights and Responsibility and Grievance Procedures	Signed and dated forms in client file
Intake for substance abuse methadone maintenance services will include medical history complete with CD4 count and viral load measurements	Signed, dated intake including this information on file in client chart
If CD4 and viral load measurements are not available, staff have 30 days to produce them	Client chart to detail efforts including: <ul style="list-style-type: none"> • Searching County database • Communication with current medical provider • Linking client to HIV primary care

Assessment – Substance Abuse Methadone Maintenance

Prior to being accepted into substance abuse methadone maintenance treatment, a client (or his/her authorized representative) must be interviewed to document the following:

- **Eligibility** – The following minimum eligibility criteria will be entered and/or documented in each client record:
 - Confirmed, documented history of no less than two years of opiate addiction
 - Confirmed history of at least two unsuccessful attempts in withdrawal treatment with subsequent relapse to illicit opiate use
 - Clients must be at least 18 years old
 - Physician certification of fitness and prescription for replacement narcotic therapy (based on physical examination, medical history and indicated laboratory findings)
 - Evidence of observed signs of physical dependence and withdrawal symptoms

The medical director can use his/her discretion in admitting potential clients who have recently resided in penal or chronic care institutions,

previously treated patients and pregnant clients who do not fully meet current listed above.

- **Assessment** – Clients will be assessed in order to obtain information required to recommend the most appropriate course of treatment. The assessment process should include the use of the Addiction Severity Index. Assessments will include (at minimum):
 - Archival data including prior arrests and contacts with the criminal justice system, previous assessments, treatment records
 - Patterns of drug and alcohol use
 - Impact of drug and alcohol abuse on major life areas such as relationships, family, employment and self-concept
 - Risk factors for continued drug and alcohol abuse, including family history of drug and alcohol abuse and social problems
 - HIV risk behaviors and factors
 - Current medical condition and relevant history, including emergency needs
 - PPD and/or chest x-ray as required by Los Angeles County guidelines
 - History of sexually transmitted diseases
 - Current HIV medications and possible illicit drug interactions(especially methadone)
 - Mental health history and psychological testing (when available)
 - Educational and vocational background
 - Housing status
 - Legal issues, including domestic violence and child welfare issues
 - Suicide, health, or other crisis risk assessments
 - Abilities, aptitudes, skills and interests
 - Client motivation and readiness for treatment
 - Client attitudes and behavior during assessment

Clients will sign an HIPAA compliant release of information form in order for the program to coordinate with the client's HIV medical provider to obtain information including, medical history, results of physical examinations and result of lab tests. Those clients without medical care providers will be referred to a medical provider as soon as possible. Seeking and complying with medical care will be a treatment plan priority for those clients without a medical provider.

If the eligibility and assessment processes determine that the program cannot meet the needs of the client, a referral to an alternate provider must be made.

STANDARD	MEASURE
All clients will be assessed to determine if they meet eligibility criteria	Signed, dated assessment in client chart to verify

<p>for methadone maintenance treatment:</p> <ul style="list-style-type: none"> • Documented history of no less than two years of opiate addiction • Confirmed history of at least two unsuccessful attempts in withdrawal treatment • Clients must be at least 18 years old • Physician certification of fitness and prescription for replacement narcotic therapy • Evidence of observed signs of physical dependence and withdrawal symptoms 	
<p>All clients will be assessed to determine their level of need, utilizing the Addiction Severity Index covering the following:</p> <ul style="list-style-type: none"> • Archival data • Patterns of drug and alcohol use • Impact of drug and alcohol abuse on major life areas • Risk factors for continued drug and alcohol abuse • Current medical condition and relevant history • Mental health history and psychological testing • Educational and vocational background • Suicide, health, or other crisis risk assessments <p>The following other assessment information will also be gathered (at minimum):</p> <ul style="list-style-type: none"> • HIV risk behaviors and factors • PPD and/or chest x-ray • History of sexually transmitted diseases • Current HIV medications and interactions • Housing status • Legal issues 	<p>Signed, dated assessment in client chart to verify</p>

<ul style="list-style-type: none"> • Abilities, aptitudes, skills and interests • Client motivation and readiness for treatment • Client attitudes and behavior 	
Programs will coordinate with client's medical provider or refer clients to medical care providers as soon as possible. Medical care is treatment priority.	Progress notes to verify. HIPAA compliant release of information form on file in client chart
If program cannot meet the needs of the client, a referral to an alternate provider must be made.	Referrals on file in client chart for those clients whose needs cannot be addressed by program

Treatment Plan – Substance Abuse Methadone Maintenance

A collaborative treatment plan will be developed for all clients based on the information gathered in the initial assessment. The treatment plan serves as the framework for the type and duration of services provided during the client's participation in the program and should include a plan review and re-evaluation schedule. Treatment plans will address necessary gender and/or sexual identity-specific services based on individual client need. Such services will be provided either on site, or by linked referral. For HIV positive clients, the treatment plan will include referrals to HIV medical care, case management and other supportive services.

An **interim treatment** plan, which identifies the client's immediate needs must be developed within three days of the date of admission. Clients must also sign an admission agreement authorizing treatment within three days of program admission.

A **comprehensive treatment** plan which includes long and short term goals for continuing treatment will be developed collaboratively within 28 days of admission. A physician must sign the treatment plan within 15 days after it has been developed collaboratively and signed by the counselor and client. At minimum, treatment plans will:

- Contain goals and objectives that reflect problem areas that have been identified in the assessment and that are broken down into manageable, measurable units with completion dates
- Identify activities or tasks the client must complete in order to attain the stated recovery goal and be action-oriented, reflecting the client's changing needs

- Be reviewed and re-evaluated as the client's needs change or phases of treatment are completed, but no less than every 90 days
- Be signed and dated by the counselor and client each time the treatment plan is developed, reviewed or re-evaluated

Program staff will regularly observe each client for changes in physical, mental, emotional and social functioning. If, during the course of treatment, needs are revealed which require a change in the existing level of service referral to another service provider will be made.

STANDARD	MEASURE
Interim treatment plans identifying immediate needs must be developed within three days of the date of admission.	Signed, dated interim treatment plan on file in client chart
Clients will sign admission agreement within three days of program admission	Signed, dated admission agreement on file in client chart
Comprehensive treatment plans, including long and short term will be developed collaboratively within 28 days of admission. Treatment plans must be signed by a physician no more than 15 days after being completed. Treatment plans will include (at minimum): <ul style="list-style-type: none"> • Goals and objectives reflecting problem areas identified in the assessment, broken down into manageable, measurable units with completion dates • Activities or tasks the client must complete. Tasks will be action-oriented, reflecting the client's changing needs 	Signed, dated treatment plans and re-evaluations on file in client chart
Program staff will observe clients for changes in physical, mental, emotional and social functioning. If newly revealed needs which require a change in service referral to another service provider will be made.	Signed, dated progress notes in client chart to confirm

Counseling Services – Substance Abuse Methadone Maintenance

Programs will make available counseling services for their clients. The selection, frequency and intensity of these services will be determined collaboratively between the counselor and client, identified and agreed upon in the initial assessment and treatment plan. At minimum, clients participating in substance abuse methadone maintenance will participate in one 50 minute individual counseling session and one group session per month. Counseling services will include:

- Crisis Intervention – assesses immediate risk, precipitating factors and provides short term solution-oriented approach to identified problem
- Couples Counseling – explores areas such as the interplay between domestic violence and substance abuse, HIV issues, sexual concerns, parenting, etc.
- Individual Counseling or Psychotherapy -- one-on-one approach to explore substance abuse issues, including co-existing mental health concerns, loss and grief, cross addictions, relapse prevention, as well as the issues listed under couple's counseling (above) as applicable.
- Family Counseling – explores the effect of substance abuse on the family system and addresses such issues as parenting as an HIV positive person, permanency planning and other HIV-related custodial care issues, co-dependency, roles, conflict resolution, etc.
- Group Counseling – consisting of from four to ten participants and covering topics such the interplay between substance abuse and HIV, risk behaviors, sexual identity, relapse, etc.
- Support Groups – either peer or professionally led, providing an environment of support for individuals in recovery

Clients should be referred to a psychiatrist who specializes in addiction medicine whenever possible if there is need for further evaluation and/or treatment with psychotropic medications.

STANDARD	MEASURE
<p>Programs will make available counseling services for their clients; selection, frequency and intensity collaboratively determined by the assessment and each client's needs and requests. Counseling services will include:</p> <ul style="list-style-type: none"> • Crisis intervention • Couples counseling 	<p>Program policy and procedures to confirm. Record of services and referrals on file in client chart</p>

<ul style="list-style-type: none"> • Individual counseling or psychotherapy • Family counseling • Group counseling • Support Groups 	
At minimum, clients will participate in one 50 minute individual counseling session and one group session per month.	Client chart review to confirm counseling participation
Clients will be referred to psychiatrist who specializes in addiction medicine whenever possible if further evaluation and/or psychotropic medications are needed	Signed, dated progress note to document referral

Support Services – Substance Abuse Methadone Maintenance

Programs will provide or coordinate the following services (at minimum):

- Provision and oversight of personal and supportive services (assistance with activities of daily living and instrumental activities of daily living)
- Health-related services (medical care, medication management, adherence, etc.)
- HIV transmission risk assessment and prevention counseling

STANDARD	MEASURE
Programs will provide or coordinate the following (at minimum): <ul style="list-style-type: none"> • Personal and supportive services • Health-related services • HIV transmission risk assessment and prevention counseling 	Program policy and procedures to confirm. Record of services and referrals on file in client chart

Education – Substance Abuse Methadone Maintenance

Programs will provide education to clients and their families on an ongoing basis to include (but not be limited to):

- HIV 101
- HIV prevention
- HIV risk reduction practices
- Harm reduction
- Addiction education, including IV drug use

- Licit and illicit drug interactions, including HIV medications
- Medical complications of substance use
- Hepatitis and other sexually transmitted diseases
- Medication adherence and nutrition
- Important health and self-care practices
- Developing a healthy sexual life, covering topics such as stigma, safer sex, disclosure and issues of domestic violence and sexual abuse
- Referral agencies supportive to people living with HIV (especially HIV support groups, 12 step meetings and 12 step alternatives)

STANDARD	MEASURE
<p>Programs provide education to clients and their families on an ongoing basis including (at minimum):</p> <ul style="list-style-type: none"> • HIV 101 • HIV prevention • HIV risk reduction practices • Harm reduction • Addiction education, including IV drug use • Licit and illicit drug interactions, including HIV medications • Medical complications of substance use • Hepatitis and other sexually transmitted diseases • Medication adherence and nutrition • Health and self-care practices • Developing a healthy sex life • Referrals 	<p>Signed, dated progress notes to detail education provided on file in client chart</p>

Referral and Linkages – Substance Abuse Methadone Maintenance

Programs providing substance abuse methadone maintenance services will demonstrate active collaboration with other agencies to provide referral to the full spectrum of HIV-related services. Formal relationships with mental health providers are especially important for assistance in crisis management or psychiatric emergencies.

Programs must maintain a comprehensive list of target providers (both internal and external), including, but not limited to HIV LA, for the full spectrum of HIV-related services. Programs will refer and link clients to services consistent with their needs and supportive of their rehabilitation. Programs must develop a mechanism to determine if referrals have been successful. Programs will

maintain and ensure clients' confidentiality throughout the referral and linkage process and will refer clients to appropriate gender and sexual identity-specific services when indicated. Referrals and linkages will include_(but not be limited to):

- medical care
- mental health treatment
- case management
- treatment advocacy
- peer support
- vocational training
- education
- legal services
- treatment education
- dental treatment

Programs will make available to clients information about public health, social services and where to apply for state, federal and/or county entitlement programs.

STANDARD	MEASURE
Programs will demonstrate active collaboration with providers of full spectrum of HIV-related services; especially important are active linkages to mental health providers	Memoranda of Understanding on file at provider agency
Programs must maintain a list of target providers to full spectrum of HIV-related services	Referral list on file at provider agency
Programs will refer and link clients to services including (but not limited to): <ul style="list-style-type: none"> • medical care • mental health treatment • case management • treatment advocacy • peer support • vocational training • education • legal services • treatment education • dental treatment 	Signed, dated progress notes on file in client chart to detail referrals and linkages
Programs must develop a mechanism to determine if referrals have been successful	Referral follow-up plan on file at provider agency. Progress notes on file in client chart to detail
Programs will maintain and ensure	Program policies and procedures to

clients' confidentiality throughout the referral and linkage	outline. Program review to confirm.
Programs will refer clients to appropriate gender and sexual identity-specific services when indicated.	Program policy and procedures and program review to confirm. Referrals and linkages on file in client charts

Discharge Planning – Substance Abuse Methadone Maintenance

Staff will collaborate with clients who are exiting methadone maintenance programs to develop a written aftercare plan that includes substance abuse treatment recommendations of various modalities and approaches, as well as referrals to appropriate services. Clients will be given a copy of the aftercare plan. Clients will be encouraged to contact the program at any time. Programs will develop mechanisms to ensure that they maintain contact with their clients post discharge.

Aftercare services provide a safety net for clients who are new to recovery while rebuilding their lives and living with HIV. Ideally, transitional or aftercare services should be provided by a program counselor involved with the client's discharge planning and prior treatment. Services are in the form of individual or group counseling and range from three to 12 months depending on client need. Sessions can address such issues as:

- Substance abuse and HIV/AIDS information
- Relapse prevention
- Personal budgeting
- Program sponsor work
- Re-establishing support groups
- Exploring and supporting sexual identification and behavior
- Maintaining sobriety
- Medication adherence

STANDARD	MEASURE
Program staff will collaboratively develop written aftercare plan with clients to have completed treatment	Signed, dated aftercare plan on file in client chart. Client has received copy of same
Programs will maintain contact with clients post discharge	Signed, dated progress notes on file in client chart to record attempts to maintain contact
Aftercare services can include individual and/or group counseling and ideally provided by a counselor familiar with the client	Signed, dated progress notes on file in client chart to record aftercare services

Program Records – Substance Abuse Methadone Maintenance

Client records shall include (but not be limited to):

- Intake information consisting of personal, family, education, drug of choice, criminal and medical history (including current physical, urinalysis and HIV status)
- Client identification data
- Diagnostic studies and tests (when appropriate)
- Treatment plan which includes problem list, short and long-term goals, and action steps generated by staff and client
- Assignment of a primary counselor and notification of change of counselor when indicated
- Description of type and frequency of services including counseling and support services provided
- Record of client interviews
- Progress notes corresponding to treatment plan that include:
 - Date, time and length of contact
 - Type of contact (i.e., group, crisis, phone call, etc.)
 - Relevant information from contact
 - Necessary action requested
 - Name, title and signature of staff member making entry
- Record of Methadone dispensing
- Referrals and linkages
- Discharge/transfer summary
- Aftercare plan

STANDARD	MEASURE
Client records shall include (but not be limited to): <ul style="list-style-type: none">• Intake information• Client identification data• Diagnostic studies and tests• Treatment plan• Assignment of a primary counselor and any changes• Record of physician contact at least every 48 hours• Description of type and frequency of services provided• Record of client interviews• Progress notes corresponding to treatment• Record of Methadone dispensing• Referrals and linkages	Client chart audit to verify

SUBSTANCE ABUSE RESIDENTIAL DETOXIFICATION

Substance abuse residential detoxification services are appropriate for individuals who have been assessed to require medical management or monitoring to complete detoxification and enter into continued treatment. Substance abuse residential detoxification programs must be licensed and approved by the State of California Department of Health Services as a Chemical Dependency Recovery Hospital and operate in accordance with Chapter 11, Title 22 of the California Code of Regulations. The maximum length of stay for substance abuse residential detoxification services is 14 days; extensions can be granted under special circumstances under physician's order.

Services will emphasize the intersection between HIV and substance abuse, with special focus given to the psychosocial aspects of living with HIV and HIV prevention. Whenever possible, clients should be provided gender and/or sexual identity-specific services or be referred to appropriate providers who provide such services. Substance abuse residential detoxification services will include:

- Initial screening
- Client intake
- Client assessment
- Treatment planning
- Providing medication prescribed by a medical professional within the scope of practice to lessen withdrawal symptoms
- Counseling services to include:
 - Crisis intervention
 - Individual counseling
 - Couples counseling
 - Family counseling
 - Group counseling
- Support groups
- Education
- Treatment linkages and referral

STANDARD	MEASURE
Substance residential detoxification programs will provide (at minimum): <ul style="list-style-type: none"> • Initial screening • Client intake • Client assessment • Treatment planning 	Program policy and procedure manual, and program monitoring to verify

<ul style="list-style-type: none"> • Providing medication prescribed by a medical professional to lessen withdrawal symptoms • Counseling services • Support groups • Education • Treatment linkages and referral 	
Services will emphasize the intersection between HIV and substance abuse	Policies and procedures and program review to confirm
Clients should be provided gender and/or sexual identity-specific services or be referred, whenever possible	Policies and procedures and program review to confirm. Linked referrals on file in client chart
Programs will be licensed the State of California Department of Health Services as a Chemical Dependency Recovery Hospital and operate in accordance with Chapter 11, Title 22 of the California Code of Regulations and procedures adopted by the OAPP and consistent with state and local laws and regulations.	License on file at provider agency. Program policy and procedure manual, schedule and program monitoring to verify
The length of stay in substance abuse residential detoxification treatment services is not to exceed 14 days.	Client file to confirm. Extensions can be made if approved by physician

Intake – Substance Abuse Residential Detoxification

Client intake is required for all patients who request or are referred to HIV substance abuse residential detoxification services. The intake determines eligibility and includes demographic data, emergency contact information, next of kin and eligibility documentation. When possible, client intake will be completed in the first contact with the potential client. In addition, client intake for substance abuse residential detoxification services will include a medical history complete with CD4 count and viral load measurements, when available. If CD4 and viral load measurements are not available at intake, staff will attempt to produce them within 30 days by searching the County's HIV data management system, communication with the client's medical provider or linking client to HIV primary medical care. (See Exhibit 1 in LINKAGES AND TOOLS for a sample Intake form.)

In the intake process and throughout substance abuse residential detoxification service delivery, **client confidentiality** will be strictly maintained and enforced. All programs will follow HIPAA guidelines and regulations for confidentiality. As needed, **Release of Information** forms will be gathered. These forms detail the

specific person/s or agencies to or from whom information will be released as well as the specific kind of information to be released. New forms must be added for individuals not listed on the most current Release of Information. (Specification should indicate the type of information that can be released.)

Required Forms: Programs must develop the following forms in accordance with state and local guidelines. Completed forms are required for each client:

- Release of Information (must be updated annually). New forms must be added for those individuals not listed on the existing Release of Information. (Specification should be made about what type of information can be released.)
- Limits of Confidentiality
- Consent to Receive Services (See Exhibit 2 in LINKAGES AND TOOLS for a sample Consent form.)
- Client Rights and Responsibilities
- Client Grievance Procedures

Additionally, the client's file must include the following documentation for eligibility:

- Proof of HIV diagnosis
- Proof of income
- Proof of residence in Los Angeles County

STANDARD	MEASURE
Intake process is begun during first contact with client	Intake tool is completed and in client file
Eligibility for services is determined	Client's file includes: <ul style="list-style-type: none"> • Proof of HIV diagnosis • Proof of income • Proof of Los Angeles County residence
Confidentiality policy and Release of Information is discussed and completed	Release of Information signed and dated by client on file and updated annually
Consent for Services completed	Signed and dated Consent in client file
Client is informed of Rights and Responsibility and Grievance Procedures	Signed and dated forms in client file
Intake for substance abuse residential detoxification services will include medical history complete with CD4 count and viral load measurements	Signed, dated intake including this information on file in client chart

If CD4 and viral load measurements are not available, staff have 30 days to produce them	Client chart to detail efforts including: <ul style="list-style-type: none"> • Searching County database • Communication with current medical provider • Linking client to HIV primary care
--	--

Assessment – Substance Abuse Residential Detoxification

Clients must be assessed and their eligibility determined before being accepted into substance abuse residential detoxification services

- **Eligibility** – Persons eligible for substance abuse residential detoxification services must have a Diagnostic and Statistical manual of Mental Disorders (DSM-IV TR) diagnosis of substance abuse or substance dependence and meet the following criteria:
 - Withdrawal potential – Client is at severe risk for withdrawal
 - Biomedical conditions – Client requires medical monitoring
 - Emotional/behavioral conditions – Client is experiencing at least moderate severity and requires 24-hour structured setting
 - Treatment acceptance/resistance – A clients' resistance is high despite negative consequences. Needs intensive motivating strategies in 24-hour structured
 - Relapse potential – Client is unable to control use and requires 24-hour structured setting
 - Recovery environment – Client is currently in an environment dangerous for recovery, necessitating removal from this environment into a 24-hour structured setting

When a program admits a patient for detoxification services, both a health questionnaire and an admission agreement must be completed and signed within 36 hours of admission.

- **Assessment** – Clients will be assessed in order to obtain information required to recommend the most appropriate course of treatment. The assessment process should include the use of the Addiction Severity Index. It should be noted that a client may be well into detoxification treatment before he/she is physically, mentally and/or emotionally able to participate in an assessment. Assessments will include (at minimum):
 - History of previous withdrawals, including a history of delirium tremens, seizures or convulsions
 - Archival data including prior arrests and contacts with the criminal justice system, previous assessments, treatment records
 - Patterns of drug and alcohol use

- Impact of drug and alcohol abuse on major life areas such as relationships, family, employment and self-concept
- Risk factors for continued drug and alcohol abuse, including family history of drug and alcohol abuse and social problems
- HIV risk behaviors and factors
- Current medical condition and relevant history, including emergency needs
- PPD and/or chest x-ray as required by Los Angeles County guidelines
- History of sexually transmitted diseases
- Current HIV medications and possible illicit drug interactions
- Mental health history and psychological testing (when available)
- Educational and vocational background
- Housing status
- Legal issues, including domestic violence and child welfare issues

Clients will sign an HIPAA compliant release of information form in order for the program to coordinate with the client's HIV medical provider to obtain information including, medical history, results of physical examinations and result of lab tests. Those clients without medical care providers will be referred to a medical provider as soon as possible. Seeking and complying with medical care will be a treatment plan priority for those clients without a medical provider.

If the eligibility and assessment processes determine that the program cannot meet the needs of the client, a referral to an alternate provider must be made.

STANDARD	MEASURE
<p>All clients will be assessed to determine if they meet eligibility criteria for residential detoxification services:</p> <ul style="list-style-type: none"> • DSM-IV TR diagnosis of substance abuse or substance dependence • Severe withdrawal potential • Requires medical monitoring • At least moderate emotional/behavioral conditions requiring 24 hour setting • High treatment resistance to require structured program • Unable to control use and requires 24 hour setting • Client's current environment is dangerous, necessitates removal to 24 hour setting 	<p>Signed, dated assessment in client chart to verify</p>
<p>All clients will be assessed to</p>	<p>Signed, dated assessment in client</p>

<p>determine their level of need, utilizing the Addiction Severity Index covering the following:</p> <ul style="list-style-type: none"> • Archival data • Patterns of drug and alcohol use • Impact of drug and alcohol abuse on major life areas • Risk factors for continued drug and alcohol abuse • Current medical condition and relevant history • Mental health history and psychological testing • Educational and vocational background • Suicide, health, or other crisis risk assessments <p>The following other assessment information will also be gathered (at minimum):</p> <ul style="list-style-type: none"> • HIV risk behaviors and factors • PPD and/or chest x-ray • History of sexually transmitted diseases • Current HIV medications and interactions • Housing status • Legal issues • Abilities, aptitudes, skills and interests • Client motivation and readiness for treatment • Client attitudes and behavior 	<p>chart to verify</p>
<p>Programs will coordinate with client's medical provider or refer clients to medical care providers as soon as possible. Medical care is treatment priority.</p>	<p>Progress notes to verify. HIPAA compliant release of information form on file in client chart</p>
<p>If program cannot meet the needs of the client, a referral to an alternate provider must be made.</p>	<p>Referrals on file in client chart for those clients whose needs cannot be addressed by program</p>

Observation – Substance Abuse Residential Detoxification

Any patient admitted to a substance abuse residential detoxification program should be observed and physically checked for life signs at least every 30 minutes during the first 12 hours following admission by staff or volunteers (a patient may not fulfill this responsibility). Such observation and physical checks should continue beyond the initial 12-hour period for as long as withdrawal signs and symptoms warrant. Documentation of information that supports a decrease in observation and physical checks must be recorded in the patient record.

STANDARD	MEASURE
Patients should be observed and physically checked for life signs at least every 30 minutes during first 12 hours of admission by staff or volunteers and longer if withdrawal signs or symptoms warrant	Notations in client chart to confirm
Supporting rationale must accompany any decrease in frequency of observation and physical checks	Signed, dated note in client chart to detail rationale

Treatment Plan – Substance Abuse Residential Detoxification

A collaborative treatment plan will be developed for all clients based on the information gathered in the initial assessment. The treatment plan serves as the framework for the type and duration of services provided during the client's participation in the program and should include a plan review and re-evaluation schedule. Treatment plans will address necessary gender and/or sexual identity-specific services based on individual client need. Such services will be provided either on site, or by linked referral. The treatment plan should include referrals to HIV medical care, case management and other supportive services.

An **interim treatment** plan, which identifies the client's immediate needs must be developed within 24 hours of admission. Clients must also sign an admission agreement authorizing treatment within three days of program admission.

A **comprehensive treatment** plan which includes long and short term goals for continuing treatment will be developed collaboratively (if the client is able to participate) within seven days of admission. At minimum, treatment plans will:

- Contain goals and objectives that reflect problem areas that have been identified in the assessment and that are broken down into manageable, measurable units with completion dates

- Identify activities or tasks the client must complete in order to attain the detoxification goal and be action-oriented, reflecting the client's changing needs
- Be reviewed and re-evaluated as the client's needs change or phases of treatment are completed
- Be signed and dated by the counselor and client each time the treatment plan is developed, reviewed or re-evaluated
- Demonstrate how the participant will be transitioned from detoxification to community support services

Program staff will regularly observe each client for changes in physical, mental, emotional and social functioning. If, during the course of treatment, needs are revealed which require a change in the existing level of service referral to another service provider will be made.

STANDARD	MEASURE
Interim treatment plans identifying immediate needs must be developed within three days of the date of admission.	Signed, dated interim treatment plan on file in client chart
Clients will sign admission agreement within three days of program admission	Signed, dated admission agreement on file in client chart
Comprehensive treatment plans, including long and short term will be developed collaboratively within seven days of admission. Treatment plans will be re-evaluated as warranted depending on client need. Treatment plans will include (at minimum): <ul style="list-style-type: none"> • Goals and objectives reflecting problem areas identified in the assessment, broken down into manageable, measurable units with completion dates • Activities or tasks the client must complete. Tasks will be action-oriented, reflecting the client's changing needs • A plan on how the participant will be transitioned from detoxification to community support services 	Signed, dated treatment plans and re-evaluations on file in client chart
Program staff will observe clients for	Signed, dated progress notes in client

changes in physical, mental, emotional and social functioning. If newly revealed needs which require a change in services, referral to another service provider will be made.	chart to confirm
---	------------------

Counseling Services – Substance Abuse Residential Detoxification

Programs will make available counseling services for their clients. The selection, frequency and intensity of these services will be determined collaboratively between the counselor and client, identified and agreed upon in the initial assessment and treatment plan, but no less than once every three days for a minimum of 15 minutes per session. Counseling services will include:

- Crisis Intervention – assesses immediate risk, precipitating factors and provides short term solution-oriented approach to identified problem
- Individual Counseling or Psychotherapy -- one-on-one approach to explore substance abuse issues, including co-existing mental health concerns, loss and grief, cross addictions, relapse prevention
- Family Counseling – explores the effect of substance abuse on the family system and addresses such issues as parenting as an HIV positive person, permanency planning and other HIV-related custodial care issues, co-dependency, roles, conflict resolution, etc.
- Group Counseling – consisting of from four to ten participants and covering topics such the interplay between substance abuse and HIV, risk behaviors, sexual identity, relapse, etc.
- Support Groups – either peer or professionally led, providing an environment of support for individuals in recovery

Clients should be referred to a psychiatrist who specializes in addiction medicine whenever possible if there is need for further evaluation and/or treatment with psychotropic medications.

STANDARD	MEASURE
Programs will make available counseling services for their clients; selection, frequency and intensity collaboratively determined by the assessment and each client's needs and requests, but no less than once every three days for a minimum of 15	Program policy and procedures to confirm. Record of services and referrals on file in client chart

minutes per session. Counseling services will include: <ul style="list-style-type: none"> • Crisis intervention • Individual counseling or psychotherapy • Family counseling • Group counseling • Support Groups 	
Clients will be referred to psychiatrist who specializes in addiction medicine whenever possible if further evaluation and/or psychotropic medications are needed	Signed, dated progress note to document referral

Support Services – Substance Abuse Residential Detoxification

Programs will provide or coordinate the following services (at minimum):

- Provision and oversight of personal and supportive services (assistance with activities of daily living and instrumental activities of daily living)
- Health-related services (medical care, medication management, adherence, etc.)
- HIV transmission risk assessment and prevention counseling
- Social services
- Recreational activities
- Meals
- Housekeeping and laundry
- Housing

STANDARD	MEASURE
Programs will provide or coordinate the following (at minimum): <ul style="list-style-type: none"> • Health-related services • HIV transmission risk assessment and prevention counseling • Social services • Recreational activities • Meals • Housekeeping and laundry • Housing 	Program policy and procedures to confirm. Record of services and referrals on file in client chart

Education – Substance Abuse Residential Detoxification

Programs will provide education to clients and their families on an ongoing basis to include (but not be limited to):

- HIV 101
- HIV prevention
- HIV risk reduction practices
- Harm reduction
- Addiction education, including IV drug use
- Licit and illicit drug interactions, including HIV medications
- Medical complications of substance use
- Hepatitis and other sexually transmitted diseases
- Medication adherence and nutrition
- Important health and self-care practices
- Developing a healthy sexual life, covering topics such as stigma, safer sex, disclosure and issues of domestic violence and sexual abuse
- Referral agencies supportive to people living with HIV (especially HIV support groups, 12 step meetings and 12 step alternatives)

STANDARD	MEASURE
<p>Programs provide education to clients and their families on an ongoing basis including (at minimum):</p> <ul style="list-style-type: none"> • HIV 101 • HIV prevention • HIV risk reduction practices • Harm reduction • Addiction education, including IV drug use • Licit and illicit drug interactions, including HIV medications • Medical complications of substance use • Hepatitis and other sexually transmitted diseases • Medication adherence and nutrition • Health and self-care practices • Developing a healthy sex life • Referrals 	<p>Signed, dated progress notes to detail education provided on file in client chart</p>

Referral and Linkages – Substance Abuse Residential Detoxification

Programs providing HIV substance abuse day treatment services will demonstrate active collaboration with other agencies to provide referral to the full spectrum of HIV-related services. Formal relationships with mental health

providers are especially important for assistance in crisis management or psychiatric emergencies.

Programs must maintain a comprehensive list of target providers (both internal and external), including, but not limited to HIV LA, for the full spectrum of HIV-related services. Programs will refer and link clients to services consistent with their needs and supportive of their rehabilitation. Programs must develop a mechanism to determine if referrals have been successful. Programs will maintain and ensure clients' confidentiality throughout the referral and linkage process and will refer clients to appropriate gender and sexual identity-specific services when indicated. Referrals and linkages will include (but not be limited to):

- medical care
- mental health treatment
- case management
- treatment advocacy
- peer support
- vocational training
- education
- legal services
- treatment education
- dental treatment

Programs will make available to clients information about public health, social services and where to apply for state, federal and/or county entitlement programs.

STANDARD	MEASURE
Programs will demonstrate active collaboration with providers of full spectrum of HIV-related services; especially important are active linkages to mental health providers	Memoranda of Understanding on file at provider agency
Programs must maintain a list of target providers to full spectrum of HIV-related services	Referral list on file at provider agency
Programs will refer and link clients to services including (but not limited to): <ul style="list-style-type: none">• medical care• mental health treatment• case management• treatment advocacy• peer support• vocational training	Signed, dated progress notes on file in client chart to detail referrals and linkages

<ul style="list-style-type: none"> • education • legal services • treatment education • dental treatment 	
Programs must develop a mechanism to determine if referrals have been successful	Referral follow-up plan on file at provider agency. Progress notes on file in client chart to detail
Programs will maintain and ensure clients' confidentiality throughout the referral and linkage	Program policies and procedures to outline. Program review to confirm.
Programs will refer clients to appropriate gender and sexual identity-specific services when indicated.	Program policy and procedures and program review to confirm. Referrals and linkages on file in client charts
Programs will provide clients with public health and social service entitlement program information	Signed, dated progress notes on file in client chart to detail

Discharge Planning – Substance Abuse Residential Detoxification

Staff will collaborate with clients who have successfully completed substance abuse residential detoxification treatment programs to develop a written aftercare plan that includes substance abuse treatment recommendations of various modalities and approaches, as well as referrals to appropriate services. Discharge planning should begin at least 72 hours before discharge. Clients will be given a copy of the aftercare plan. Clients will be informed that they are welcome to contact the program at any time.

STANDARD	MEASURE
Program staff will collaboratively develop written aftercare plan with clients to have completed treatment. Discharge planning should begin at least 72 hours before discharge.	Signed, dated aftercare plan on file in client chart. Client has received copy of same

Program Records – Substance Abuse Residential Detoxification

Client records shall include (but not be limited to):

- Intake information consisting of personal, family, educations, drug of choice, criminal and medical history (including current physical, urinalysis and HIV status)
- Client identification data
- Diagnostic studies and tests (when appropriate)

- Treatment plan which includes problem list, short and long-term goals, and action steps generated by staff and client
- Assignment of a primary counselor, and notification of change of counselor when indicated
- Observation log
- Physician contact at least every 48 hours
- Description of type and frequency of services including counseling and support services provided
- Record of client interviews
- Progress notes corresponding to treatment plan that include:
 - Date, time and length of contact
 - Type of contact (i.e., group, crisis, phone call, etc.)
 - Relevant information from contact
 - Necessary action requested
 - Name, title and signature of staff member making entry
- Medication log
- Referrals and linkages
- Discharge/transfer summary
- Aftercare plan

STANDARD	MEASURE
<p>Client records shall include (but not be limited to):</p> <ul style="list-style-type: none"> • Intake information • Client identification data • Diagnostic studies and tests • Treatment plan • Assignment of a primary counselor, and changes when indicated • Observation log • Record of physician contact at least every 48 hours • Description of type and frequency of services provided • Record of client interviews • Progress notes corresponding to treatment • Medication log • Referrals and linkages • Discharge/transfer summary • Aftercare plan 	<p>Client chart audit to verify</p>

OUTCOMES AND MEASURABLE INDICATORS FY 2006

Outcome A: Completeness of Care

Measurable Performance Indicators:

1. Percent of clients whose treatment record documents education regarding harm-reducing and risk-reducing techniques for high-risk behaviors related to HIV.
Baseline Benchmark: 100% of clients
2. Percent of clients who have had at least one HIV-related medical care consultation during the substance abuse treatment period.
Baseline Benchmark: 100% of clients in detox
75% of clients in day treatment
75% of clients in methadone maintenance
3. Percent of clients who stay at least 14 days in treatment who are referred to and linked with community resources as specified in the treatment plan.
Baseline Benchmark: 75% of clients
4. Percent of clients who have completed their prescribed length of treatment and received the number of individual counseling sessions described in the individualized treatment plan.
Baseline Benchmark: 90% of clients
5. Percent of clients completing the course of substance abuse treatment described in their individual plan that are successfully referred to the appropriate next level of care.
Baseline Benchmark: 65% of clients

Outcome B: Satisfaction with Care

Measurable Performance Indicator:

1. Percent of clients who report satisfaction with services they received.
Baseline Benchmark: 90% of clients

STAFFING REQUIREMENTS AND QUALIFICATIONS

At minimum, all substance abuse treatment staff will possess the ability to provide linguistically and culturally age-appropriate care to people living with HIV and complete documentation as required by their positions. Substance abuse treatment staff will complete an agency-based orientation before providing services. In addition, all new staff must receive HIV/AIDS education within the first three months of employment. Staff will also be trained and oriented regarding client confidentiality and HIPAA regulations.

All direct service staff and clinical supervisors must attend a minimum of 20 hours of HIV/AIDS training each year. All management, clerical and support staff must attend a minimum of eight hours of HIV/AIDS training each year. Training topics must include:

- The role of substances in HIV disease prevention and progression
- Sexual identification and gender issues
- Current medical treatment and updates
- Mental health issues for people living with HIV
- Confidentiality and disclosure
- Community resources
- Grief and loss

Direct service staff will be supervised according to the mandates of their respective licensure or certification. At minimum, all direct service staff and volunteers providing treatment services will be required to attend a minimum of two hours per month of clinical supervision or consultation, one hour of which must be individual, face-to-face clinical skill development. The objective of such supervision is to improve treatment skills, maintain quality of services to clients and to monitor compliance with program policies and procedures.

At least 50% of program staff providing counseling services in each alcohol or other drug program shall be certified pursuant to the requirements of California Code of Regulations, Title 9, Division 4, Chapter 8.

STANDARD	MEASURE
Substance abuse treatment staff will possess the ability to provide linguistically and culturally age-appropriate care and complete documentation as required by their positions	Resumes and record of training in employee file to verify
Staff will receive an agency orientation, HIV training within three months of employment and oriented and trained in confidentiality and HIPAA	Record of orientation and training in employee file

compliance	
Ongoing HIV/AIDS training is required of all staff: <ul style="list-style-type: none"> • Direct service staff – 20 hours/year • Management, clerical and support staff – 8 hours/year 	Record of trainings in employee file
Direct service staff will be supervised according to the mandates of their respective licensure or certification. At minimum, all direct service staff and volunteers providing treatment services will attend a minimum of two hours per month of clinical supervision; one hour of which must be individual, face-to-face clinical skill development.	Documentation of supervision on file at provider agency
At least 50% of counseling staff shall be certified pursuant to the requirements of California Code of Regulations, Title 9, Division 4, Chapter 8	Certifications available for review in employee file

SUBSTANCE ABUSE DAY TREATMENT

Substance abuse day treatment programs must have the following staff:

Administrative and Support Staff

- **Program Director** responsible for submitting protocols and reports, program operations, regulation compliance, training and supervising staff and security of client records and medications
- **Program Administrator** or designee who is on-site and able to return telephone calls within one and one-half hours and able to appear in person within three hours
- **Licensed Clinical Social Worker, Marriage and Family Therapist, Clinical Psychologist or Physician** with a minimum of three of the last ten years experience working with HIV and addictions, or a certified counselor with a minimum of five of the last ten years experience working with HIV and addictions to supervise program staff and provide professional expertise as appropriate
- **Support Staff** to perform office work, cooking, house cleaning, laundering and maintenance activities

Direct Care Staff

Programs will ensure that all direct service staff are appropriately trained and that all services requiring specialized skills are performed by licensed or certified personnel. Programs shall maintain a ratio of not less than one counselor for every 12 clients enrolled. Counselors may be nurses, psychologists, social workers, psychiatric technicians, trained counselors, graduate interns, counselors enrolled in certificate programs or others with training or experience in treating persons with HIV and addictions. Direct care staff will include:

- **Counselor(s)** designated to perform admission, intake, assessment and ongoing evaluation of clients' treatment and care needs
- **Counselor(s)** responsible for oversight and provision of planned activities, as well as oversight of volunteers where applicable

STANDARD	MEASURE
Day treatment programs require the following administrative staff: <ul style="list-style-type: none">• Program Director responsible for submitting protocols and reports, program operations, regulation compliance, training and supervising staff, etc.• Program administrator on-site and/or able to return telephone calls within one and one-half hours and able to appear in person within three hours• Licensed Clinical Social Worker, Marriage and Family Therapist, Clinical Psychologist or Physician or certified counselor with required experience to supervise program staff and provide professional expertise as appropriate• Support Staff to perform office work, cooking, house cleaning, laundering and maintenance activities	Employee records and staffing plan to verify
Programs require the following direct service staff: <ul style="list-style-type: none">• Counselor(s) to perform admission, intake, assessment and ongoing evaluation of clients' treatment and care needs	Employee records and staffing plan to verify

<ul style="list-style-type: none"> • Counselor(s) responsible for oversight and provision of planned activities and volunteers 	
Counselors will be nurses, psychologists, social workers, psychiatric technicians, trained counselors, graduate interns, counselors enrolled in certificate programs or others with training or experience in treating persons with HIV and addictions	Resumes and licenses or certificates in employee files
Programs shall maintain a ratio of not less than one counselor for every 12 clients enrolled	Employee records and staffing plan to confirm

SUBSTANCE ABUSE METHADONE MAINTENANCE

Substance abuse methadone maintenance programs are required to have the following staff:

Administrative and Support Staff

- **Medical Director**, licensed as a physician in the State of California. Duties may be delegated to other licensed physicians, but not to physician extenders (physician assistants or nurse practitioners). The medical director assumes medical responsibility for all patients by:
 - Signing client records and notes
 - Placing clients in treatment
 - Initiating, altering and terminating replacement narcotic therapy medications and dosages
 - Supervising the administration and dispersing of medications
 - Planning and supervising the provision of treatment, including regular review and patient notes
- **Program Director** (this function can also be filled by medical director) responsible for submitting protocols and reports, program operations, regulation compliance, training and supervising staff and security of client records and medications
- **Support Staff** (as necessary) to perform office work, etc.

Direct Care Staff

Programs will ensure that all direct service staff are appropriately trained and that all services requiring specialized skills are performed by licensed or certified personnel. Programs shall maintain a ratio of not less than one counselor for every 40 clients enrolled. Counselors may be nurses, psychologists, social workers, psychiatric technicians, trained counselors, graduate interns, counselors enrolled in certificate programs or others with training or experience in treating persons with HIV and addictions. Direct care staff will include:

- **Counselor(s)** designated to perform admission, intake, assessment and ongoing evaluation of clients' treatment and care needs
- **Counselor(s)** responsible for oversight and provision of planned activities, as well as oversight of volunteers where applicable
- **Licensed Personnel** under the medical director's direction to administer or dispense medications to patients
- **Medical Director** or medical designee to see each client face-to-face at least once every three months

STANDARD	MEASURE
<p>Substance abuse methadone maintenance programs require the following administrative staff:</p> <ul style="list-style-type: none"> • Medical Director, licensed as a physician in the State of California, assumes medical responsibility for all patients. • Program Director responsible for protocols and reports, program operations, regulation compliance, training and supervising staff and security of client records and medications • Support Staff to perform office work, etc. 	<p>Employee records and staffing plan to verify</p>
<p>Programs require the following direct service staff:</p> <ul style="list-style-type: none"> • Counselor(s) to perform admission, intake, assessment and ongoing evaluation of clients' treatment and care needs • Counselor(s) responsible for oversight and provision of planned activities and volunteers • Licensed personnel to administer 	<p>Employee records and staffing plan to verify</p>

or dispense medications • Medical Director or medical designee to see each client face-to-face at least once every three months	
Counselors will be nurses, psychologists, social workers, psychiatric technicians, trained counselors, graduate interns, counselors enrolled in certificate programs or others with training or experience in treating persons with HIV and addictions	Resumes and licenses or certificates in employee files
Programs shall maintain a ratio of not less than one counselor for every 40 clients enrolled	Employee records and staffing plan to confirm

SUBSTANCE ABUSE RESIDENTIAL DETOXIFICATION

Substance abuse residential detoxification programs are required to have the following staff:

Administrative and Support Staff

- **Medical Director**, licensed as a physician in the State of California. Duties may be delegated to other licensed physicians, but not to physician extenders (physician assistants or nurse practitioners). The medical director assumes medical responsibility for all patients by:
 - Signing client records and notes
 - Placing clients in treatment
 - Supervising the administration and dispersing of medications
 - Planning and supervising the provision of treatment, including regular review and patient notes
- **Program Director** (this function can also be filled by medical director) responsible for submitting protocols and reports, program operations, regulation compliance, training and supervising staff and security of client records and medications
- **Nurse Practitioner or Physician's Assistant** to manage the day-to-day program operations and be on site at least four hours per day. If staff does not include either of these professionals, the Medical Director's time in the program must be expanded

- **Registered Nurse** to remain on-call. **Nurse's Aides** (e.g., rehabilitation technicians or detoxification aides) should be on duty at all times. Appropriate support for nurse's aides includes, at minimum, a nurse and a back-up physician
- **Support Staff** (as necessary) to perform office work, cooking, house cleaning, laundering and maintenance activities

Direct Care Staff

Programs will ensure that all direct service staff are appropriately trained and that all services requiring specialized skills are performed by licensed or certified personnel. Programs shall maintain a ratio of not less than one counselor for every 12 clients enrolled and a medical staffing ratio of not less than one nurse for every 24 clients. Counselors may be nurses, psychologists, social workers, psychiatric technicians, trained counselors or others with training or experience in treating persons with HIV and addictions or detoxification services. Clients will not be used to fulfill staffing requirements. Direct care staff will include:

- **Counselor(s)** designated to perform admission, intake, assessment and ongoing evaluation of clients' treatment and care needs
- **Counselor(s)** responsible for oversight and provision of planned activities, as well as oversight of volunteers where applicable
- **Current First-Aid-Trained Staff or Volunteer** on duty and awake at all times
- **Medical Director** or medical designee to see each client face-to-face at least every 48 hours

STANDARD	MEASURE
<p>Substance abuse residential detoxification programs require the following administrative staff:</p> <ul style="list-style-type: none"> • Medical Director, licensed as a physician in the State of California, assumes medical responsibility for all patients. • Program Director (can also be filled by medical director) responsible for submitting protocols and reports, program operations, regulation compliance, training and supervising staff, etc. • Nurse Practitioner or Physician's 	<p>Employee records and staffing plan to verify</p>

<p>Assistant to manage the day-to-day program operations and be on site at least four hours per day. If staff does not include either of these professionals, the Medical Director's time in the program must be expanded</p> <ul style="list-style-type: none"> • Registered Nurse to remain on-call. <p>Programs shall maintain a ratio of not less than one counselor for every 12 clients enrolled and not less than one nurse for every 24 clients enrolled</p>	Employee records and staffing plan to confirm

SERVICE UNITS

Unit of Service: Units of service (defined as reimbursement for substance abuse treatment services) are based on specific substance abuse treatment services provided to eligible clients.

Outpatient Substance Abuse Treatment in Structured Day Treatment Units -- Calculated in number of client visits to day treatment program.

Methadone Maintenance Drug Treatment Units -- Calculated in number of methadone doses.

Methadone Maintenance Substance Abuse Counseling Units -- Calculated in number of support counseling sessions provided.

Substance Abuse Residential Detoxification Units -- Calculated in number of residential days provided.

Number of Clients: Client numbers are documented using the figures for unduplicated clients within a given contract period.

QUALITY MANAGEMENT

All programs will implement a Quality Management (QM) program that assesses the extent to which care and services provided are consistent with federal (e.g. Public Health Service and CDC Guidelines), State and local standards of HIV/AIDS care and services. The QM program will (at minimum):

- Identify the leadership and accountability of the medical director or executive director of the program
- Use measurable outcomes and data collected to determine progress toward established benchmarks and goals
- Focus on linkages to care and support services
- Track client perception of their health and effectiveness of services
- Serve as a continuous quality improvement (CQI) process reported annually to senior leadership

QUALITY MANAGEMENT PLAN

Programs will develop **one** agency-wide QM plan that encompasses all HIV/AIDS care and prevention services if possible. This plan will be reviewed and updated as needed by the agency's QM committee and signed by the medical director or executive director. The written QM plan shall include the following components (at minimum):

Objectives: The QM plan should delineate specific goals and objectives that reflect the program's mission, vision and values

Quality Management Committee: The QM plan will describe the purpose of the Quality Management Committee, its composition, meeting frequency (quarterly, at minimum) and required documentation (e.g., minutes, agenda, sign-in sheets, etc.). Programs that already have an established advisory committee need not create a separate Quality Management Committee, so long as the already existing advisory committee's composition and activities conform to QM program objectives.

Selection of the QM Approach: The QM plan will detail an elected QM approach, such as Plan-Do-Study-Act (PDSA), Chronic Care Model, or Joint Commission on Accreditation of Healthcare Organization (JCAHO) 10-Step model, etc.

Quality Management Program Content: The QM plan will detail program content to include (at minimum):

- **Measurement of Outcome Indicators** – collection and analysis of data measured from specific OAPP selected indicators (at minimum). In addition, agency can measure other aspects of care and services as needed
- **Development of Data Collection Method** -- to include sampling strategy (e.g., frequency, percentage of sample sized), collection method (e.g., chart abstraction, interviews, surveys, etc.) and creation of a data collection tool.
- **Collection and Analysis of Data** – results will be reviewed and discussed by the QM committee. The findings of the data analysis will be communicated with all involved program staff.
- **Identification of Improvement Strategies** – QM committee will be responsible for identifying improvement strategies, tracking progress and sustaining achieved improvement.

Client Feedback Process: The QM plan will describe the mechanism for obtaining ongoing feedback from clients regarding the accessibility and appropriateness of service and care. Feedback will also include the degree to which the service meets client need and satisfaction. Client input will be discussed in the agency's QM committee on a regular basis for the enhancement of service delivery. Aggregate data is to be reported to the QM committee annually for continuous program improvement.

Client Grievance Process: The QM plan will detail the program's policy and procedure for addressing and resolving client's grievance at the level closest to the source within agency. Grievance data will be tracked, trended and reported to the QM committee for improvements in care and services. (See also PROGRAM REQUIREMENTS AND GUIDELINES).

Random Internal Chart Audits: The QM plan will detail a plan for random chart audits for Medical outpatient, Medical Nutrition Therapy, Case Management, Mental Health, Psychiatry and Oral Health services. Sampling criteria will be based on important aspects of care and will be, at minimum, 10% or 30 charts, whichever is less. Results of the chart audits will be reported and discussed quarterly in the QM committee.

STANDARD	MEASURE
Programs will develop a Quality Management Plan	Quality Management Plan on file at provider agency which details (at minimum):

	<ul style="list-style-type: none"> • Objectives • Quality Management Committee • Quality Management Approach • Quality Management Program <p>Content including (at minimum)</p> <ul style="list-style-type: none"> ○ Measurement of outcome indicators ○ Development of data collection method ○ Collection and analysis of data ○ Identification of improvement strategies <ul style="list-style-type: none"> • Client Feedback Process • Client Grievance Process • Random Internal Chart Audits (when appropriate)
Quality management plan will be reviewed and updated as needed by the agency's QM committee and signed by the medical director or executive director	Record of review on file at provider agency. Updated QM plans on file at provider agency

PROGRAM REQUIREMENTS AND GUIDLELINES

Agencies providing substance abuse treatment services must have written policies that address confidentiality, release of information, client rights and responsibilities, universal precautions, eligibility and client grievances.

Confidentiality protects information about a clients HIV status, risk factors and use of services. A **Release of Information Form** describes the situations under which a client's information can be released and includes the name of the agency with whom information will be shared, the specific information to be shared, duration of the release consent, and the client's signature. A release of information can be rescinded verbally or in writing at any time. For agencies and information covered by the Health Insurance Portability and Accountability Act (HIPAA), the Release of Information must be a HIPAA-compliant disclosure authorization.

Funded providers are expected to post and provide to each consumer the **Patients' Bill of Rights** developed by the Los Angeles County Commission on HIV which outlines a client's/patient's right to:

- respectful treatment
- competent, high quality care
- be part of the decision making process
- confidentiality and privacy
- billing information and assistance.

In addition, the Patient's Bill of Rights outlines the client/patient responsibilities as a service consumer. Programs are welcome to develop their own Bill of Rights as long as the Commission on HIV Bill is used as a minimum standard. A copy of the Commission on HIV Patient's Bill of Rights is found as Exhibit 3 in LINKAGES AND TOOLS.

A **grievance procedure** details a procedure for clients to voice their concerns about unfair treatment or the quality of services they are receiving. Grievance procedures should detail the steps a client can follow to file a grievance and how the grievance will be handled within the agency. Included in the procedure should be steps for client appeal.

STANDARD	MEASURE
Programs will develop and enforce client confidentiality policy	Written policy on file
Programs will develop and enforce client grievance policy	Written policy on file and posted in a visible location
Programs shall post and provide each client with a Patient's Bill of Rights	Copy of Commission on HIV Patient's Bill of Rights (or program's specific Bill) on file and posted in a visible location.

	Each client file to note that Bill of Rights has been provided.
Agency develops and enforces written eligibility requirements for services	Written policy on file
Agency develops and enforces policy for obtaining client consent	Client consent form on file
Client records are stored in secure and confidential location	Records stored in locked file, cabinet, or room with limited access
Agency has written policies which address the following: <ul style="list-style-type: none"> • Physical plant safety • Medical/health care • Infection control and transmission risk management • Crisis management • Personnel • Risk assessment and response • Service planning • Documentation • Client/Guardian rights and responsibilities • Client discharge and transition 	Written policies on file

LINKAGES

In certain cases, clients will require additional services a given agency is unable to provide. It is incumbent upon provider agencies to develop mechanisms and referral sources to make available the full range of additional services to meet the needs of their clients. Also vital is the coordination of client care with HIV medical care clinics. Developing mechanisms that ensure contact with a client's HIV medical care clinic will ensure integration of services and better client care.

STANDARD	MEASURE
Provider agencies develop and provide referrals for full range of services	Memoranda of Understanding with additional providers on file
Special effort will be made to develop feedback mechanisms with HIV medical clinics to ensure integration of service and better client care	Memoranda of Understanding with primary medical clinics on file

PROGRAM SAFETY

Services must be provided in settings that meet federal, state and local requirements. Such requirements ensure the well-being and safety of clients and staff. Facilities should be easily accessible by all, clean, comfortable and free of hazards.

STANDARD	MEASURE
Program promotes and practices Universal Precautions	Written policy on file
Program is Americans with Disabilities Act (ADA) compliant for physical accessibility	Signed confirmation on file
Program has developed and enforces policy for health and safety related incidents.	Written policy, reviewed by all staff, on file
Agency complies with all required federal, state and local safety regulations (includes OSHA)	Signed confirmation, as needed, on file

CULTURAL AND LINGUISTIC COMPETENCE

All providers must be involved in a process of training and education that increases cultural and linguistic competence and improves their ability to provide culturally and linguistically appropriate services to all people living with HIV. Culturally and linguistically appropriate services:

- Respect, relate and respond to a client's culture in a non-judgmental, respectful manner
- Match the needs and reflect the culture and language of the clients being served
- Recognize the significant power differential between provider and client, member of the dominant culture vs. minority, and work toward developing a more collaborative interaction
- Consider each client as an individual, not making assumptions based on perceived membership in any group or class

Important in the development of cultural and linguistic competence is the ability to acknowledge one's personal limits in cultural and linguistic competence, and the willingness to treat one's client as the expert on their culture and relation to it.

STANDARD	MEASURE
Programs will recruit a diverse staff that reflects the cultural and linguistic diversity of the community served	Programs have a written strategy on file
All staff (including administrative staff) will receive ongoing training to build	All staff required to attend one training per year, verified in personnel file

cultural and linguistic competence	
Programs will maintain a physical environment that is welcoming to the populations served	Site visit will ensure
All programs will ensure access to services for clients with limited English	Programs will ensure through: <ul style="list-style-type: none"> • Bilingual staff • Face to face interpretation provided by qualified staff or volunteers • Telephone interpretation services for emergency needs • Referral to bilingual/bicultural programs
Clients' family and friends will not be considered as ongoing interpreters because of confidentiality and medical terminology limitations. If a client chooses to use family or friend as their interpreter, the provider must obtain consent. It is preferred that children under 18 not serve as interpreters.	If used, family/friend interpretation consent form signed by client will be kept on file.
Interpreters, bilingual staff and volunteers must demonstrate bilingual proficiency and be trained in the skills and ethics of interpreting. Training on terms relevant to HIV services must be provided.	Resume and documentation of training; certification (when applicable) on file
Clients shall have access to linguistically appropriate educational materials and signage	Programs must provide educational materials and required documentation (consents, grievance procedures, etc.) in the native language of the populations served
Programs will conduct ongoing assessments of cultural and linguistic competence of staff and program	Cultural competence measures developed and maintained into program and staff assessments and evaluations

GENDER AND SEXUAL IDENTITY COMPETENCE

All providers should be involved in a process of training and education that ensures their ability to deliver appropriate services regarding diverse gender and sexual identity issues relevant to people living with HIV, including Lesbian, Gay, Transgender, Bisexual, Intersexed or Queer-identified individuals. Competency in gender and sexual identity issues should include:

- Respect for and the ability to relate and respond to a client's sexual identity, sexual orientation, and gender identity in an informed and non-judgmental manner.
- Understanding the specific needs of underserved sexual and gender minority groups.
- Understanding the specific needs of women.
- Recognizing and being sensitive to the dominant culture's historic oppression of sexual and gender minorities, and working toward developing a collaborative interaction.
- Considering each client as an individual, not making assumptions based on perceived membership in any gender or sexual identity group.
- Deferring to the client's self-identification and not imposing normative culture values onto client.

STANDARD	MEASURE
Programs will recruit a diverse staff that reflects the gender and sexual diversity of the community served	Programs have a written strategy on file
All staff (including administrative staff) will receive ongoing training to build gender and sexual diversity competence	All staff required to attend one training per year, verified in personnel file
Programs will maintain a physical environment that is welcoming to the populations served	Site visit will ensure
Program documents and materials will utilize inclusive language	Documents on file for verification

ACCESSIBILITY OF SERVICES

Providers must demonstrate the capacity to ensure that services are accessible and relevant to all people living with HIV, including linguistic and cultural minorities and people with disabilities.

STANDARD	MEASURE
Agency complies with ADA criteria	Completed form/certification on file
Services are accessible to target population	Site visit to review hours of operation, location, accessibility with public transportation
Services are offered to any person meeting eligibility requirements within funding capacity	Written eligibility requirements and grievance procedures on file
Programs incorporate consumer input in design, delivery and evaluation of services	Documentation of consumer advisory board meetings, focus groups and other consumer input mechanisms on

	file.

STAFF/COMMITTEE REPORT

Purpose of these Notes: Each expert panel session requires a complex discussion of both the detail and the larger issues included in the Standard under discussion. These notes attempt to capture the complexity of the discussion in the Substance Abuse Treatment Panel, convened on July 20, 2005, as well as the areas where the panel was split and struggled to an incomplete consensus. These are areas ripe for review when the Standards are revisited for revision.

Issues emerging from the discussion:

1. **HIV Focus of the Substance Abuse Services:** Panel members felt that there should be a focus throughout the standard on the specific needs of clients living with HIV, including their special educational, risk reduction and medical needs. Members noted that reimbursement rates for the services provided under this standard are higher than for similar services funded in other ways, and felt that the differential made it reasonable to set these additional standards.
2. **Grouping of Services:** The panel noted that the grouping of disparate services together in this single standard made discussion and decision-making more difficult, since few specific standards could be made to apply to all the services in each section.
3. **Harm Reduction:** The panel worried about the inclusion of language describing and defining harm reduction in the standards. They noted that harm reduction services are not currently funded under this category and that, although the Commission and the treatment community as a whole understands the harm reduction philosophy to be a useful one, individual treatment programs may not use that model and should not be asked to endorse it with clients. The sensitivity of this issue was such that the group recommended excising some of the descriptive harm reduction language.
4. **Methadone Maintenance:** There was no representative of a methadone maintenance provider on the panel, and members considered this category last and with even less time than the other categories. For these reasons, the panel felt less secure about its recommendations and thought this standard should be revisited soon if the Commission intends to fund the service.
5. **Linkage with Medical Providers:** There was strong support on the panel for the importance of connecting clients with HIV medical providers for care and of establishment in medical care as a goal of substance abuse treatment. Many in the group expressed frustration with the difficulty of communicating with medical providers and a sense that they were not reliably providing clients with education about HIV, risk prevention, nutrition, and other basic topics.

COMMITTEE ACTION:

- **Issue raised post-Panel:** There were no additional comments introduced by panel participants after expert review.
- **Issue raised from Public Comment:** There were no public comments received in response to the Commission's call for comments.

CONSENT TO RECEIVE SERVICES

DESCRIPTION OF SERVICES:

AGENCY X provides a comprehensive range of services to HIV/AIDS infected individuals residing or receiving services in the South Central region of Los Angeles. The Case Management, Home Health Care, Mental Health, Treatment Advocacy & Education, Peer-Self Help, Woman/Family Support Advocacy, and Passport To Care Programs work closely with other community agencies, both public and private, to help all participants achieve their individual goals and move toward long term self sufficiency.

All of the programs at **AGENCY X** are designed to provide sensitive and flexible coordination of services and assist HIV/AIDS infected participants in obtaining necessary advocacy and linkage, resources, referrals, HIV education, and emotional support. Services that might be facilitated include, but need not be limited to, those which address medical, nutritional, financial, housing, educational, transportation, and psychosocial needs.

Participation in Programs at **AGENCY X** are voluntary and subject to eligibility requirements.

Consent:

I, _____, am applying to participate in the following programs at
Printed Name of Applicant

AGENCY X:

- ☐ Case Management ☐ Home Health Care ☐ Mental Health ☐ Treatment Advocacy & Education
☐ Peer-Self Help ☐ Woman/Family Support Advocacy ☐ Psychiatric Services

I agree to cooperate with **AGENCY X** staff who will determine my eligibility for the above checked programs and services.

If I am eligible and choose to participate in this program, I understand that:

With the assistance of the staff person in the programs I am enrolled in, I will be an active participant in the process for deciding which services and referrals are needed or beneficial according to my personal situation. I will be notified by the staff person in the programs I am enrolled in of what services I am eligible to receive and any subsequent changes made to these services.

Information from my records will be seen only by staff and consultants of **AGENCY X**, service providers who will be serving me, and as otherwise provided by law.

I understand that participation in the programs at **AGENCY X** is voluntary and I may withdraw from this program at any time.

I will only receive services in the programs I am enrolled in as long as:

- I meet eligibility requirements for this program.
- I am not receiving mental health services from any other HIV/AIDS program funded by the County of Los Angeles Office of AIDS Programs and Policy (OAPP).
- I legally reside in the Los Angeles County.
- Funding for this program is available.
- I do not violate **AGENCY X's** *Client's Rights and Responsibilities*.

I may request a grievance hearing if my application for participation is denied, if I am discharged from the program or if I am dissatisfied with services I receive.

All concerns that I have regarding any of the programs at **AGENCY X** have been fully answered at this time.

If I have additional concerns, I am able to contact the manager of this program at (323)-555-5555.

PEOPLE WITH HIV/AIDS BILL OF RIGHTS AND RESPONSIBILITIES

The purpose of this Patient and Client Bill of Rights is to help enable clients act on their own behalf and in partnership with their providers to obtain the best possible HIV/AIDS care and treatment. This Bill of Rights and responsibilities comes from the hearts of people living with HIV/AIDS in the diverse communities of Los Angeles County. As someone newly entering or currently accessing care, treatment or support services for HIV/AIDS, you have the right to:

A. Respectful Treatment

1. Receive considerate, respectful, professional, confidential and timely care in a safe client-centered environment without bias.
2. Receive equal and unbiased care in accordance with federal and state law.
3. Receive information about the qualifications of your providers, particularly about their experience managing and treating HIV/AIDS or related services.
4. Be informed of the names and work phone numbers of the physicians, nurses and other staff members responsible for your care.
5. Receive safe accommodations for protection of personal property while receiving care and services.
6. Receive services that are culturally and linguistically appropriate, including having full explanation of all services and treatment options provided clearly in your own language and dialect.
7. Look at your medical records and receive copies of them upon your request (reasonable agency policies including reasonable fee for photocopying may apply).
8. When special needs arise, extended visiting hours by family, partner, or friends during inpatient treatment, recognizing that there may be limits imposed for valid reasons by the hospital, hospice or other inpatient institution.

B. Competent, High-Quality Care

1. Have your care provided by competent, qualified professionals who follow HIV treatment standards as set forth by the Federal Public Health Service Guidelines, the Centers for Disease Control and Prevention (CDC), the California Department of Health Services, and the County of Los Angeles.
2. Have access to these professionals at convenient times and locations.
3. Receive appropriate referrals to other medical, mental health or other care services.

C. Make Treatment Decisions

1. Receive complete and up-to-date information in words you understand about your diagnosis, treatment options, medications (including common side effects and complications) and prognosis that can reasonably be expected.
2. Participate actively with your provider(s) in discussions about choices and options available for your treatment.
3. Make the final decision about which choice and option is best for you after you have been given all relevant information about these choices and the clear recommendation of your provider.
4. Refuse any and all treatments recommended and be told of the effect not taking the treatment may have on your health, be told of any other potential consequences of your refusal and be assured that you have the right to change your mind later.
5. Be informed about and afforded the opportunity to participate in any appropriate clinical research studies for which you are eligible.
6. Refuse to participate in research without prejudice or penalty of any sort.
7. Refuse any offered services or end participation in any program without bias or impact on your care.
8. Be informed of the procedures at the agency or institution for resolving misunderstandings, making complaints or filing grievances.
9. Receive a response to any complaint or grievance within 30 days of filing it.
10. Be informed of independent ombudsman or advocacy services outside the agency to help you resolve problems or grievances (see number at bottom of this form), including how to access a federal complaint center within the Center for Medicare and Medicaid Services (CMS).

D. Confidentiality and Privacy

1. Receive a copy of your agency's Notice of Privacy Policies and Procedures. Your agency will ask you to acknowledge receipt of this document.
2. Keep your HIV status confidential or anonymous with respect to HIV counseling and testing services. Have information explained to you about confidentiality policies and under what conditions, if any, information about HIV care services may be released.
3. Request restricted access to specific sections of your medical records.
4. Authorize or withdraw requests for your medical record from anyone else besides your health care providers and for billing purposes.
5. Question information in your medical chart and make a written request to change specific documented information. Your physician has the right to accept or refuse your request with an explanation.

E. Billing Information and Assistance

1. Receive complete information and explanation in advance of all charges that may be incurred for receiving care, treatment and services as well as payment policies of your provider.
2. Receive information on any programs to help you pay and assistance in accessing such assistance and any other benefits for which you may be eligible.

F. Patient/Client Responsibilities

In order to help your provider give you and other clients the care to which you are entitled, you also have the responsibility to:

1. Participate in the development and implementation of your individual treatment or service plan to the extent that you are able.
2. Provide your providers, to the best of your knowledge, accurate and complete information about your current and past health and illness, medications and other treatment and services you are receiving, since all of these may affect your care. Communicate promptly in the future any changes or new developments.
3. Communicate to your provider whenever you do not understand and information you are given.
4. Follow the treatment plan you have agreed to and/or accepting the consequences of failing the recommended course of treatment or of using other treatments.
5. Keep your appointments and commitments at this agency or inform the agency promptly if you cannot do so.
6. Keep your provider or main contact informed about how to reach you confidentially by phone, mail, or other means.
7. Follow the agency's rules and regulations concerning patient/client care and conduct.
8. Be considerate of your providers and fellow clients/patients and treat them with the respect you yourself expect.
9. The use of profanity or abusive or hostile language; threats, violence or intimidation; carrying weapons of any sort; theft or vandalism; intoxication or use of illegal drugs; sexual harassment and misconduct is strictly prohibited.
10. Maintain the confidentiality of everyone else receiving care or services at the agency by never mentioning to anyone who you see here or casually speaking to other clients not already know to you if you see them elsewhere.

For More Help or Information

Your first step in getting more information or resolving any complaints or grievances should be to speak with your provider or a designated client services representative or patient or treatment advocate at the agency. If this does not resolve any problem in a reasonable time span, or if serious concerns or issues arise that you feel you need to speak about with someone outside the agency, you may call the number below for confidential, independent information and assistance.
